Getting started

Overview

- | | |
|---|----------------------------------|
| 1. Headset jack | 10. Main speaker and microphone |
| 2. Proximity sensor/Light sensor | 11. Main camera lens |
| 3. Ear receiver/Charging light/Notification light | 12. Camera light |
| 4. Front camera lens | 13. Second microphone |
| 5. Micro SIM card slot cover | 14. NFC™ detection area |
| 6. Power key | 15. Memory card slot cover |
| 7. Volume/Zoom key | 16. Charger/USB cable port cover |
| 8. Camera key | 17. Charging dock connector |
| 9. Strap hole | |

- ! Do not insert fingers or other objects into the opening for the second microphone (illustrated in item 13 above) to avoid damaging your device.

Assembly

A protective plastic sheet is attached to the screen. You should peel off this sheet before using the touchscreen, otherwise the touchscreen might not function properly.

To insert the memory card

- ! Do not insert a micro SIM card into the memory card slot.

- 1 Insert a fingernail into the gap between the memory card cover and the device, then detach the memory card cover.
- 2 Place the memory card in the memory card slot, with the gold-coloured contacts facing down, then push the memory card all the way into the slot until you hear a locking sound.
- 3 Reattach the memory card cover.

- ! The memory card may not be included at purchase in all markets.

To insert the micro SIM card

- ! Do not insert a memory card into the micro SIM card slot.

- 1 Insert a fingernail into the gap between the micro SIM card slot cover and the device, then detach the cover.
 - 2 Using a fingernail, pull out the micro SIM card holder.
 - 3 Place the micro SIM card on the holder, with the gold-coloured contacts on the micro SIM card facing up.
 - 4 Insert the micro SIM card holder back into the device.
 - 5 Re-attach the micro SIM card slot cover.
- ! Inserting the micro SIM card into the device without the SIM card holder could damage your micro SIM card or your device, and Sony Mobile does not warrant and will not be responsible for any damage caused by such action.

To remove the memory card

To remove the micro SIM card

[Missing image]

- 1 Remove the cover of the micro SIM card slot.
- 2 Pull out the micro SIM card holder.
- 3 Remove the micro SIM card.
- 4 Insert the micro SIM card holder back into its slot.
- 5 Re-attach the micro SIM card slot cover.

Starting your device for the first time

The first time you start your device, a setup guide opens to explain basic functions and help you enter essential settings. This is a good time to configure the device to your specific needs. You can also access the setup guide later from the settings menu.

To turn on the device

- ! Make sure that the battery is charged for at least 30 minutes before you turn on the device for the first time.

- 1 Press and hold down the power key  until the device vibrates.
- 2 If your screen goes dark, briefly press the power key  to activate the screen.
- 3 Place a finger on the screen and swipe up or down to unlock the screen.
- 4 Enter your SIM card PIN when requested, then select **OK**.
- 5 Wait a while for the device to start.

- 💡 Your SIM card PIN is initially supplied by your network operator, but you can change it later from the **Settings** menu. To correct a mistake made while entering your SIM card PIN, tap .

To turn off the device

- 1 Press and hold down the power key  until the options menu opens.
- 2 In the options menu, tap **Power off**.
- 3 Tap **OK**.

- ! It may take a while for the device to shut down.

Why do I need a Google™ account?

Your Xperia™ from Sony runs on the Android™ platform, developed by Google™. There is a range of Google™ applications and services that come with your device, like Gmail™, Google Maps™, YouTube™ and Google Play™ - the online store for Android™ applications.

If you want more info about Android™ and Google™, go to www.sonymobile.com/support.

You need a Google™ account to:

- Download and install applications from Google Play™.
- Synchronize email, contacts and calendar.
- Chat with friends using Google Talk™.
- Synchronize your browsing history and bookmarks.

To set up a Google™ account on your device

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Add account** > **Google**.
- 3 Follow the registration wizard to create a Google™ account, or sign in if you already have an account.

- 💡 You can also sign in to or create a Google™ account from the setup guide the first time you start your device. Or you can go online and create an account at www.google.com/accounts.

Charging your device

The battery is partly charged when you buy the device. You can still use your device while it is charging. Charging your device over a long period of time, for example, overnight, does not damage the battery or the device.

The battery will start to discharge a little after it is fully charged and then charges again after a certain time when the charger is connected. This is to extend battery life and may result in the charge status showing a level below 100 percent.

- 💡 Read more about the battery and how to improve the performance in *Battery and power management*. on page 122.

To charge your device

- 1 Plug the charger into a power outlet.
 - 2 Plug one end of the USB cable into the charger (or into the USB port of a computer).
 - 3 Plug the other end of the cable into the micro USB port on your device, with the USB symbol facing up. The notification light is lit when charging starts.
 - 4 When the device is fully charged, disconnect the cable from your device by pulling it straight outwards. Make sure not to bend the connector.
- 💡 If the battery is completely discharged, it may take a few minutes before the notification light is lit and  appears.

Battery notification light status

| | |
|--------------|--|
| Green | The battery is fully charged |
| Flashing red | The battery level is low |
| Orange | The battery is charging. The battery level is between low and full |

Learning the basics

Using the touchscreen

The touchscreen is made from glass. Glass screens are sensitive to drops and mechanical shocks.

- ! Do not touch the screen if the glass is cracked or shattered. Avoid trying to repair a damaged screen yourself. Cases of negligent care are not covered by the Sony warranty service.

Tapping

- Open or highlight an item.
- Mark or unmark a checkbox or option.
- Enter text with the onscreen keyboard.

Touching and holding

- Move an item.
- Activate an item specific menu.
- Activate certain modes, for example mark several mode in a list.

Pinching and spreading

- Zoom in or out on a web page, a photo or a map.

Swiping

- Scroll a list up or down.
- Scroll left or right, for example between Home screen panes or application panes.

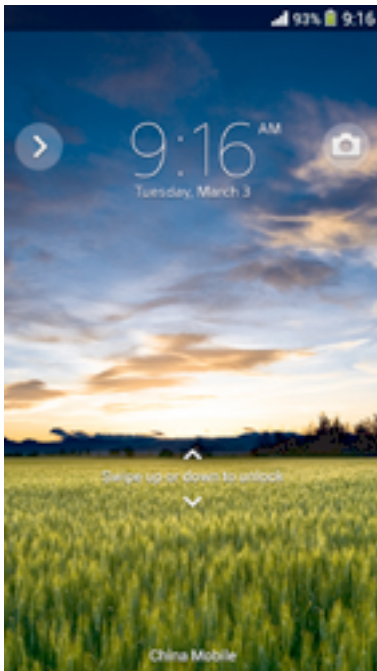

Flicking

- Scroll quickly, for example in a list or web page. You can stop the scrolling movement by tapping the screen.

Locking and unlocking the screen

When your device is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touch screen when you are not using it.

To activate the screen

- Briefly press the power key (⏻).

To unlock the screen

- Place a finger on the screen and swipe up or down.
- ! There are several ways to unlock the screen, see *Setting a screen lock* on page 117.

To lock the screen manually

- When the screen is active, briefly press the power key (⏻).

Home screen

The four corners on the **Home screen** help you access applications or web page shortcuts quickly.

The **Home screen** is your gateway to the main features. It consists of a number of Home screen panes that extends beyond the regular screen display width.

● ● ○ ● ● shows which part of the **Home screen** you are in.

To go to the Home screen

- Press .

To browse the Home screen

Home screen panes

When you touch and hold an empty area of your Home screen, the customization options for the Home screen appears where you can change the Home screen panes.

To set a pane as the main Home screen pane

- 1 Touch and hold an empty area on your **Home screen** until the device vibrates.
- 2 Flick left or right to browse to the pane that you want to set as your main Home screen pane, then tap .

To add a pane to your Home screen

- 1 Touch and hold an empty area on your **Home screen** until the device vibrates.
- 2 Flick left or right to browse the panes, then tap .

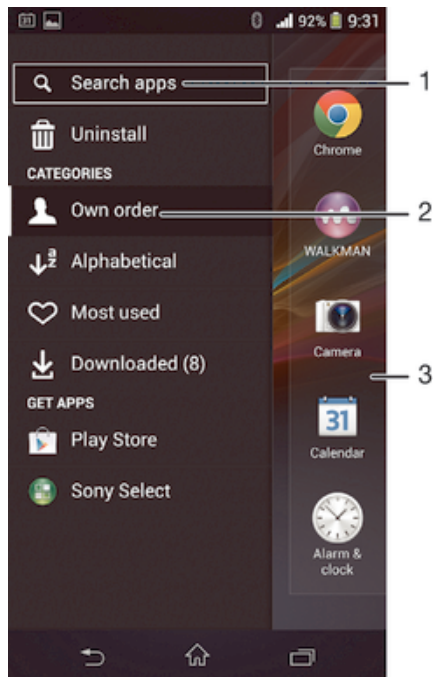

To delete a pane from your Home screen

- 1 Touch and hold an empty area on your **Home screen** until the device vibrates.
- 2 Flick left or right to browse to the pane that you want to delete, then tap .

Application screen

The Application screen, which you open from the **Home screen**, contains the applications that come pre-installed on your device as well as the applications you download.

Application screen overview

- 1 Sort applications in preferred order
- 2 Search installed applications
- 3 Access a menu with more options
- 4 Application pane. Flick left or right to view more applications.

To open an application from the Application screen

- Flick left or right to find the application, and then tap the application.

To arrange applications on the Application screen

- Tap the sort applications drop-down list and select an option.

To move an application on the Application screen

- Touch and hold an application until it magnifies and the device vibrates, then drag it to the new location.
- ! You can only move applications when **Own order** is selected.

To uninstall an application from the Application screen

- 1 Tap , then tap **Uninstall**. All uninstalleable applications are indicated by .
- 2 Tap the application that you want to uninstall, then tap **Uninstall**.

To add a shortcut to an application on the Home screen

- 1 Touch and hold an application icon until the screen vibrates, then drag the icon to the top of the screen. The **Home screen** opens.
- 2 Drag the icon to the desired location on the **Home screen**, then release your finger.

To share an application from the Application screen

- 1 Tap , then tap **Share**. All applications which can be shared are indicated by .
- 2 Tap the application that you want to share, then select an option and confirm, if necessary. A link to a download of the application is sent to the people you have selected.

Navigating applications

You can navigate between your applications with the navigation keys. Some applications are closed when you press  to exit while others continue to run in the background or pause. If the application is paused or runs in the background, you can continue where you left off the next time you open the application.

A quick way to navigate between your favourite applications is to use the recently used applications window.

Navigating applications overview

- 1 Recently used applications window. Select a recently used application.
- 2 Small apps bar. Select a small app.
- 3 Navigation key. Open the recently used applications window.
- 4 Navigation key. Close the application and go back to the **Home** screen.
- 5 Navigation key. Go back to the previous screen within the application or close the application.

To open a menu in an application

- While using the application, press .

Small apps

A small app only takes up a small area of your screen and it opens on top of other applications and screens. You can for example use it to make some quick notes or calculations without closing the running application. More small apps are available at Google Play™.

To open a small app

- 1 To make the small apps bar appear, press .
- 2 Tap the small app that you want to open. A small app window appears.

To close a small app

- Tap  on the small app window.

To download a small app

- 1 Tap  > .
- 2 Find a small app that you want to download, then follow the instructions to complete the installation.

To move a small app

- When the small app is open, touch and hold the top left corner of the small app, then move it to the desired location.

To minimise a small app

- When the small app is open, touch and hold the top left corner of the small app, then drag it to the right edge or to the bottom edge of the screen.

To rearrange your small apps

- Touch and hold a small app and drag it to the desired position in the small apps bar.

To remove a small app from the small apps bar

- Touch and hold a small app icon and drag it away from the small apps bar.

To restore a previously removed small app

- 1 Tap  > Installed small apps.
- 2 Select the small app that you want to restore.

Widgets

A widget is a window or a shortcut to the actual application. For example, the “WALKMAN” widget allows you to start playing music directly on the **Home screen**.

You can place your widgets anywhere on the **Home screen** and if you want to explore additional widgets, you can download them from Google Play™.

To add a widget to the Home screen

- 1 Touch and hold an empty area on your **Home screen** until the device vibrates, then tap **Widgets**.
- 2 Find and tap the widget that you want to add.

To resize a widget

- 1 Touch and hold a widget until it magnifies and the device vibrates, then release the widget. If the widget can be resized, for example, the Calendar widget, then a highlighted frame and resizing dots appear.
- 2 Drag the dots inward or outward to shrink or expand the widget.
- 3 To confirm the new size of the widget, tap anywhere on the **Home screen**.

To move a widget on the Home screen

- Touch and hold the widget until it magnifies and the device vibrates, then drag it to the new location.

To delete a widget from the Home screen

- Touch and hold the widget until it magnifies and the device vibrates, then drag it to .

Shortcuts and folders

Use shortcuts and folders to tidy up your screen and handle your applications.

Shortcuts and folders overview

- 1 Access a folder with applications
- 2 Access an application using a shortcut

To add a shortcut to your Home screen

- 1 Touch and hold an empty area on your **Home** screen until the device vibrates.
- 2 Tap **Apps > Shortcuts**.
- 3 Select a shortcut.

- 💡 You can add an application shortcut directly from the Application screen by touching and holding the application.

To move an item on the Home screen

- Touch and hold the item until it magnifies and the device vibrates, then drag the item to the new location.

To delete an item from the Home screen

- Touch and hold an item until it magnifies and the device vibrates, then drag the item to .

To create a folder on the Home screen

- 1 Touch and hold an application icon or a shortcut until it magnifies and the device vibrates, then drag and drop it on top of another application icon or shortcut.
- 2 Enter a name for the folder and tap **Done**.

To add items to a folder on the Home screen

- Touch and hold an item until it magnifies and the device vibrates, then drag the item to the folder.

To rename a folder on the Home screen

- 1 Tap the folder to open it.
- 2 Tap the folder's title bar to show the **Folder name** field.
- 3 Enter the new folder name and tap **Done**.

Background and themes

Adapt the screen to your own style using wallpapers and different themes.

To change your wallpaper

- 1 Touch and hold an empty area on your **Home** screen until the device vibrates.
- 2 Tap **Wallpapers** and select an option.

To set a theme

- 1 Touch and hold an empty area on your **Home** screen until the device vibrates.
- 2 Tap **Themes**, then select a theme.

- ! When you change a theme, the background also changes in some applications.

Status and notifications

The icons in the status bar inform you of new messages, calendar notifications, signal strength, battery status, and activities in progress such as file downloads. You can drag down the status bar to open the Notification panel and handle your notifications.

To open or close the notification panel

To open a running application from the Notification panel

- Tap the icon for the running application to open it.

To dismiss a notification from the Notification panel

- Place your finger on a notification and flick left or right.

To clear the Notification panel

- From the Notification panel, tap **Clear**.

Notification light

A notification light gives you battery status information and some notifications. For example, a flashing blue light means there is a new message or a missed call.

Icons in the status bar

Status icons

Application overview

| | |
|---|---|
|  | Use the Alarm and clock application to set various kinds of alarms. |
|  | Use your web browser to navigate and view web pages, manage bookmarks, and manage text and images. |
|  | Use the Calculator application to perform basic calculations. |
|  | Use the Calendar application to keep track of your events and manage your appointments. |
|  | Use the camera to take photos and record video clips. |
|  | Use the Contact application to manage phone numbers, email address and other information related to your contacts. |
|  | Access your downloaded applications. |
|  | Use the Email application to send and receive emails through both private and corporate accounts. |
|  | Use the Facebook application to engage in social networking with friends, family members and colleagues around the world. |
|  | Browse and listen to FM radio stations. |
|  | Use the Album application to view and to work with your photos and videos. |
|  | Use the Gmail™ application to read, write and organise email messages. |
|  | Search for information in your device and on the web. |

-  View your current location, find other locations, and calculate routes using Google Maps™.
-  Go to Google Play™ to download free and paid applications for your device.
-  Use the Messaging application to send and receive text and multimedia messages.
-  Use the Movies application to play videos in your device, and share videos with your friends or on other devices using DLNA™.
-  Use the "WALKMAN" application to organise and play music, audio books and podcasts.
-  Navigate your way using spoken, turn-by-turn instructions.
-  View news stories and weather forecasts.
-  Make phone calls by dialling the number manually or by using the smart dial function.
-  Search for places, for example, restaurants and cafés.
-  Use the Video Unlimited™ application to rent and purchase videos.
-  Use the subscription-based Music Unlimited™ application to access millions of songs over a mobile data connection or Wi-Fi® connection.
-  Optimise settings to suit your own requirements.
-  Use the Google Talk™ application to chat with friends online.
-  Identify music tracks that you hear playing in your surroundings, and get artist, album and other info.
-  Use the Help application to access user support in the device. For example, you can access a User guide, troubleshooting information, plus tips and tricks.
-  Use YouTube™ to share and view videos from around the world.
-  Download and install new applications and updates.

! Some applications are not supported all networks and/or service providers in all areas.

Google Play™ and downloading applications

Downloading applications from Google Play™

Google Play™ is the online store for applications, games, music, movies and books and it includes both free and paid applications. Before you start downloading from Google Play™, make sure that you have a working Internet connection, preferably over Wi-Fi® to avoid data traffic charges.

- ! To use Google Play™, you need to have a Google™ account. Google Play™ may not be available in all countries or regions.

To download an application from Google Play™

- 1 From the **Home screen**, tap .
 - 2 Find and tap **Play Store**.
 - 3 Find an item you wish to download by browsing categories, or by using the search function.
 - 4 Tap the item to view its details, and follow the instructions to complete the installation.
- ! Some applications may need to access data, settings and various functions on your device in order to work properly. Only install and give permissions to applications you trust. You can see the granted application permissions by tapping the application from **Settings > Apps**.

Downloading applications from other sources

When your device is set to allow downloads, you can download applications directly from other websites by following the download instructions on the website.

- ! Installing applications of unknown or unreliable origin can damage your device. Only download applications from reliable sources. Contact the application provider if you have any questions or concerns.

To allow download of applications from other sources

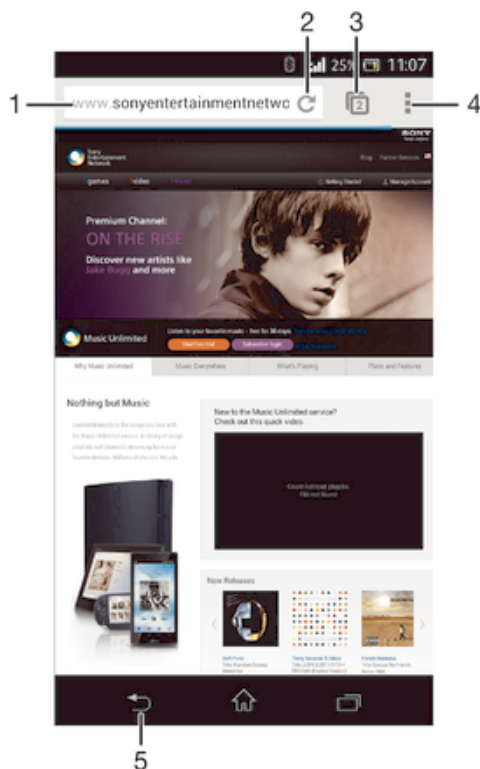

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Settings > Security**.
 - 3 Mark the **Unknown sources** checkbox.
 - 4 Tap **OK**.
- ! Some applications may need to access data, settings and various functions on your device in order to work properly. Only install and give permissions to applications you trust. You can see the granted application permissions by tapping the application from **Settings > Apps**.

Internet and networks

Browsing the web

The Google Chrome™ web browser for Android™ devices comes pre-installed in most markets. Go to <http://support.google.com/chrome> and click the "Chrome for Mobile" link to get more detailed information about how to use this web browser.

Web browser overview

- 1 Search and address field
- 2 Refresh the page
- 3 Access browser tabs
- 4 View help and options
- 5 Back in browser history

To start browsing

- 1 From your Home screen, tap .
- 2 Find and tap .
- 3 Enter a search term or web address in the search and address field to start browsing.

Internet and messaging settings

To access the Internet and to send multimedia messages you must have a mobile data connection and correct settings (also called APN's - Access Point Names). When the settings are installed, a data connection can be established between your device and the Internet. The Internet and messaging settings are usually preinstalled on your device. If not, you can download the settings or add the settings manually.

Contact your network operator for detailed information about Internet and messaging settings.

- 💡 Deleting an APN and adding the setting again can be useful if you cannot access the Internet, have no data connection, or cannot send or receive multimedia messages.

To download Internet and messaging settings

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Xperia™ > Internet settings**.
- 3 Tap **Accept**.

To add Internet settings manually

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > More... > Mobile networks > Access Point Names**.
- 3 Tap .
- 4 Tap **New APN**.
- 5 Tap **Name** and enter the name of the network profile that you want to create.
- 6 Tap **APN** and enter the access point name.
- 7 Enter all other information required by your network operator.
- 8 Tap , then tap **Save**.

To view the current APN

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > More... > Mobile networks**.
- 3 Tap **Access Point Names**.

- ! If you have several available connections, the active network connection is indicated by a marked button.

To delete all Internet settings

- 1 From the **Home screen**, tap .
- 2 Tap **Settings > More... > Mobile networks > Access Point Names**.
- 3 Tap .
- 4 Tap **Reset to default**. All Internet and messaging settings are deleted.

Wi-Fi®

When you are in range of a **Wi-Fi®** network you can browse the Internet through that connection. Once you have connected to a **Wi-Fi®** network, your device remembers it and automatically connects to it the next time you come within reach and **Wi-Fi®** is on.

Some **Wi-Fi®** networks require you to log in to a web page before you can get access. Contact the **Wi-Fi®** network administrator for more information.

The signal strength of **Wi-Fi®** networks differ. Moving closer to the **Wi-Fi®** access point increases the signal strength.

Available **Wi-Fi®** networks may be open or secured:

- Open networks are indicated by  next to the **Wi-Fi®** network name.
 - Secured networks are indicated by  next to the **Wi-Fi®** network name.
- 💡 Some **Wi-Fi®** networks does not show up in the list of available networks because they do not broadcast their network name (SSID). If you know the network name, you can add it manually to your list of available **Wi-Fi®** networks.

To turn on Wi-Fi®

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Settings**.
 - 3 Drag the slider beside **Wi-Fi** to the right to turn on the **Wi-Fi®** function.
- ! It may take a few seconds before **Wi-Fi®** is enabled.

To connect to a Wi-Fi® network

- 1 From the **Home** screen, tap .
 - 2 Find and tap **Settings**.
 - 3 Make sure that the **Wi-Fi®** function is on. Tap **Wi-Fi**.
 - 4 Available **Wi-Fi®** networks are displayed. The available networks may be open or secured. Open networks are indicated by  and secured networks are indicated by  next to the **Wi-Fi®** network name.
 - 5 Tap a **Wi-Fi®** network to connect to it. If you are trying to connect to a secure network, you are asked to enter a password.  is displayed in the status bar once you are connected.
- ! Your device remembers **Wi-Fi®** networks you connect to. The next time you come within reach of a previously connected **Wi-Fi®** network, your device automatically connects to it.
- 💡 In some locations, open **Wi-Fi®** networks require you to log in to a web page before you can get access to the network. Contact the relevant **Wi-Fi®** network administrator for more information.

To add a Wi-Fi® network manually

- 1 Make sure that **Wi-Fi®** is turned on.
 - 2 From the **Home** screen, tap .
 - 3 Find and tap **Settings > Wi-Fi**.
 - 4 Tap **+**.
 - 5 Enter the **Network SSID** for the network.
 - 6 Tap the **Security** field to select a security type.
 - 7 If required, enter a password.
 - 8 Tap **Save**.
- ! **Wi-Fi®** network name is indicated as SSID, ESSID, Access Point, etc. Contact your **Wi-Fi®** network administrator to get the Network SSID name and password.

Wi-Fi® settings

When you are connected to a **Wi-Fi®** network or when there are **Wi-Fi®** networks available in your vicinity, it is possible to see the status of these **Wi-Fi®** networks. You can also enable your device to notify you whenever an open **Wi-Fi®** network is detected.

If you are not connected to a **Wi-Fi®** network, your device uses a mobile data connection to access the Internet (if you have set up and enabled a mobile data connection on your device). By adding a **Wi-Fi®** sleep policy, you can specify when to switch from **Wi-Fi®** to mobile data.

To enable Wi-Fi® network notifications

- 1 Turn on **Wi-Fi®**, if it is not already on.
- 2 From your **Home** screen, tap .
- 3 Find and tap **Settings > Wi-Fi**.
- 4 Press .
- 5 Tap **Advanced**.
- 6 Mark the **Network notification** checkbox.

To view detailed information about a connected Wi-Fi® network

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings > Wi-Fi**.
- 3 Tap the **Wi-Fi®** network that you are currently connected to. Detailed network information is displayed.

To add a Wi-Fi® sleep policy

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Press .
- 4 Tap **Advanced**.
- 5 Tap **Keep Wi-Fi on during sleep**.
- 6 Select an option.

Sharing your mobile data connection

You can share your device's mobile data connection with a single computer using a USB cable. This process is called USB tethering. You can also share your device's data connection with up to eight other devices at once, by turning your device into a portable Wi-Fi® hotspot.

Mobile data connection sharing overview

When your device is sharing its data connection, the following icons may appear in the status bar or in the Notification panel:

USB tethering is active

Portable Wi-Fi® hotspot is active

To share your data connection using a USB cable

- 1 Deactivate all USB cable connections to your device.
- 2 Using the USB cable that came with your device, connect your device to a computer.
- 3 From your **Home** screen, tap .
- 4 Find and tap **Settings** > **More...** > **Tethering & portable hotspot**.
- 5 Mark the **USB tethering** checkbox.
- 6 To stop sharing your data connection, unmark the **USB tethering** checkbox or disconnect the USB cable.

! You cannot share your device's data connection and internal storage over a USB cable at the same time.

💡 You may need to prepare your computer to establish a network connection via USB cable. Go to www.android.com/tether to get the most current information.

To use your device as a portable Wi-Fi® hotspot

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **Tethering & portable hotspot**.
- 3 Tap **Portable Wi-Fi hotspot settings** > **Configure Wi-Fi hotspot**.
- 4 Enter the **Network SSID** for the network. Tap the **Security** field to select a security type.
- 5 If required, enter a password.
- 6 Tap **Save**.
- 7 Mark the **Portable Wi-Fi hotspot** checkbox. Your device starts broadcasting its Wi-Fi network name (SSID). Up to eight computers or other devices can now connect to this network.
- 8 Unmark the **Portable Wi-Fi hotspot** checkbox when you want to stop sharing your data connection via Wi-Fi®.

To rename or secure your portable hotspot

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **Tethering & portable hotspot**.
- 3 Tap **Portable Wi-Fi hotspot settings** > **Configure Wi-Fi hotspot**.
- 4 Enter the **Network SSID** for the network.
- 5 To select a security type, tap the **Security** field.
- 6 If required, enter a password.
- 7 Tap **Save**.

Controlling data usage

Adjusting data usage settings can help you keep greater control over data usage but cannot guarantee the prevention of additional charges.

To turn data traffic on or off

- 1 Drag the status bar downwards and tap ✕.
- 2 Tap **Data usage**.
- 3 Tap the on-off switch beside **Mobile data traffic** to turn data traffic on or off.

💡 When data traffic is turned off, you can still use Wi-Fi® and Bluetooth™ connections. You can also send and receive multimedia messages.

To set a data usage warning

- 1 Make sure that you have turned on data traffic.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Settings > Data usage**.
- 4 To set the warning level, drag the lines to the desired values. You receive a warning notification when the amount of data traffic approaches the level you set.

To set a data usage limit

- 1 Make sure that you have turned on data traffic.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Settings > Data usage**.
- 4 Mark the **Set mobile data limit** checkbox if it is not marked, then tap **OK**.
- 5 To set the data usage limit, drag the lines to the desired values.

! Once your data usage reaches the set limit, data traffic on your device will be turned off automatically.

To control the data usage of individual applications

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Data usage**.
- 3 Find and tap the desired application.
- 4 Make the necessary adjustments to change the data usage limit, restrict background data, or restrict all data traffic for the application.
- 5 To access more specific settings for the application (if available), tap **View app settings** and make the desired changes.

💡 The performance of individual applications may be affected if you change the related data usage settings.

Data roaming

Some network operators allow you to send and receive mobile data when you are roaming outside of your home network. It's recommended to check the relevant data transmission rates in advance.

To activate or deactivate data roaming

- 1 Drag the status bar downwards and tap ✕.
- 2 Tap **More... > Mobile networks**.
- 3 Mark or unmark the **Data roaming** checkbox.

! You can't activate data roaming when data connections have been deactivated.

Selecting mobile networks

Your device automatically switches between mobile networks depending on what mobile networks are available in different areas. You can also manually set your device to use a particular mobile network mode, for example, WCDMA or GSM.

To select a network mode

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **Mobile networks**.
- 3 Tap **Network Mode**.
- 4 Select a network mode.

To select another network manually

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **Mobile networks** > **Service providers**.
- 3 Tap **Search mode** > **Manual**.
- 4 Select a network.

- ! If you select a network manually, your device will not search for other networks, even if you move out of range of the manually selected network.

To activate automatic network selection

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **Mobile networks** > **Service providers**.
- 3 When a pop-up window appears, tap **Search mode**.
- 4 Tap **Automatic**.

Virtual private networks (VPNs)

Use your device to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from outside the actual network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are travelling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate in your device. For detailed information on how to set up a connection to your virtual private network, please contact the network administrator of your company or organisation.

To add a virtual private network

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **VPN**.
- 3 Tap **+**.
- 4 Select the type of VPN to add.
- 5 Enter your VPN settings.
- 6 Tap **Save**.

To connect to a virtual private network

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings** > **More...** > **VPN**.
- 3 In the list of available networks, tap the VPN that you want to connect to.
- 4 Enter the required information.
- 5 Tap **Connect**.

To disconnect from a virtual private network

- 1 Drag the status bar downwards.
- 2 Tap the notification for the VPN connection to turn it off.

Basic settings

Accessing settings

View and change settings for your device from the Settings menu. The Settings menu is accessible from both the Notification panel and the Application screen.

Setting your device from the Notification panel

You can open the settings menu from the Notification panel to adjust basic device settings. For example, you can turn on Wi-Fi®.

To open the device settings menu from the Notification panel

- 1 Drag the status bar downwards.
- 2 Tap .

To control the Wi-Fi® function from the Notification panel

- 1 Drag the status bar downwards.
- 2 Tap .

To access your device settings

- 1 From your Home screen, tap .
- 2 Tap **Settings**.

 You can also drag the status bar downwards on the Home screen and tap  to access your device settings.

Customising your device

You can adjust several device settings to suit your own needs. For example, you can change the language, add a personal ringtone, or change the screen brightness.

Adjusting the volume

You can adjust the ringtone volume for incoming calls and notifications as well as for music and video playback.

To adjust the ring volume with the volume key

- Press the volume key up or down.

To adjust the media playing volume with the volume key

- When playing music or watching video, press the volume key up or down.

Adjusting the sound settings

You can adjust several sound settings. For example, you can set your device to silent mode so that it doesn't ring when you're in a meeting.

To set your device to vibrate mode

- Press the volume key down until  appears in the status bar.
-  You can also press and hold down the power key  and then tap  in the menu that opens to set your device to vibrate mode.

To set your device to silent mode

- 1 Press the volume key down until the device vibrates and  appears in the status bar.
 - 2 Press the volume key down again.  appears in the status bar.
-  You can also press and hold down the power key  and then tap  in the menu that opens to set your device to silent mode.

To set your device to vibrate and ring mode

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Sound**.
- 3 Mark the **Vibrate when ringing** checkbox.

Time and date

You can change the time and date on your device.

To set the date manually

- 1 From the Home screen, tap .
- 2 Find and tap **Settings > Date & time**.
- 3 Unmark the **Automatic date & time** checkbox, if it is marked.
- 4 Tap **Set date**.
- 5 Adjust the date by scrolling up and down.
- 6 Tap **Done**.

To set the time manually

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Date & time**.
- 3 Unmark the **Automatic date & time** checkbox if it is marked.
- 4 Tap **Set time**.
- 5 Scroll up or down to adjust the hour and minute.
- 6 If applicable, scroll up to change **am** to **pm**, or vice versa.
- 7 Tap **Done**.

-  When you have set the correct time, you can quickly switch to the time of a specific time zone by tapping **Select time zone**, and then selecting a time zone.

To set the time zone

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Date & time**.
- 3 Unmark the **Automatic time zone** checkbox, if it is marked.
- 4 Tap **Select time zone**.
- 5 Select an option.

Ringtone settings

To set a ringtone

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Sound > Phone ringtone**.
- 3 Select a ringtone.
- 4 Tap **Done**.

To enable touch tones

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Sound**.
- 3 Mark the **Dial pad touch tones** and **Touch sounds** checkboxes.

To select the notification sound

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound > Default notification sound**.
- 3 Select the sound to be played when notifications arrive.
- 4 Tap **Done**.

Screen settings

To adjust the screen brightness

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display > Brightness**.
- 3 Drag the slider to adjust the brightness.
- 4 Tap **OK**.

 The brightness level affects your battery performance.

To set the screen to vibrate

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Sound**.
- 3 Mark the **Vibrate on touch** checkbox. The screen now vibrates when you tap soft keys and certain applications.

To adjust the idle time before the screen turns off

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display > Sleep**.
- 3 Select an option.

 To turn off the screen quickly, briefly press the power key .

To keep the screen active while your device is charging

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > Developer options**.
- 3 Mark the **Stay awake** checkbox.

Language settings

You can select a default language for your device and change it again at a later time.

To change the language

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > Language & input > Language**.
- 3 Select an option.
- 4 Tap **OK**.

 If you select the wrong language and cannot read the menu texts, find and tap . Then select the text beside  and select the first entry in the menu that opens. You can then select the language you want.

Airplane mode

In Airplane mode, the network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your internal storage. You can also be notified by alarms, if alarms are activated.

 Turning on Airplane mode reduces battery consumption.

To turn on Airplane mode

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Settings > More....**
 - 3 Mark the **Airplane mode** checkbox.
-  You can also press and hold down the power key  and then select **Airplane mode** in the menu that opens.

Enhancing the sound output

You can enhance the sound output that comes from the speakers in your device using features such as Clear Phase™ and xLOUD™ technology.

Using Clear Phase™ technology

Use Clear Phase™ technology from Sony to automatically adjust the sound quality coming from your device's internal speakers and get a cleaner, more natural sound.

To enhance the speaker sound quality using Clear Phase™

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Settings > Sound**.
 - 3 Mark the **Clear Phase™** checkbox.
-  The activation of the Clear Phase™ feature has no effect on voice communication applications. For example, there is no change in the voice call sound quality.

Using xLOUD™ technology

Use xLOUD™ audio filter technology from Sony to enhance the speaker volume without sacrificing quality. Get a more dynamic sound as you listen to your favourite songs.

To enhance the speaker volume using xLOUD™

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Settings > Sound**.
 - 3 Mark the **xLOUD™** checkbox.
-  The activation of the xLOUD™ feature has no effect on voice communication applications. For example, there is no change in the voice call sound quality.

- 3 Mark the **xLOUD™** checkbox.

- ! The activation of the xLOUD™ feature has no effect on voice communication applications. For example, there is no change in the voice call sound quality.

Typing text

About typing text

You can select from a number of keyboards and input methods to type text containing letters, numbers and other characters.

On-screen keyboard

Tap the keys of the on-screen QWERTY keyboard to enter text conveniently. Some applications open the on-screen keyboard automatically. You can also open this keyboard by touching a text field.

Using the on-screen keyboard

- 1 Change the character case and turn on the caps lock. For some languages, this key is used to access extra characters in the language.
- 2 Close the on-screen keyboard view. Note that this icon does not appear in portrait mode.
- 3 Display numbers and symbols.
- 4 Personalise your keyboard. This key disappears after the keyboard is personalised.
- 5 Enter a space.
- 6 Enter a carriage return or confirm text input.
- 7 Delete a character before the cursor.

! All illustrations are for illustration purposes only and may not accurately depict the actual device.

To display the on-screen keyboard to enter text

- Tap a text entry field.

To hide the on-screen keyboard

- When the on-screen keyboard is open, tap .

To personalise the on-screen keyboard

- 1 Open the on-screen keyboard, then tap .
 - 2 Follow the instructions to personalise your on-screen keyboard, for example, mark the **Smiley key** checkbox.
- 💡 If you don't mark the **Smiley key** checkbox when you personalise the on-screen keyboard, the smiley icon will not appear.

To use the on-screen keyboard in landscape orientation

- When you enter text, turn the device sideways.
- ! For the keyboard to support this feature, landscape mode must be supported by the application you are using, and your screen orientation settings must be set to automatic.

To enter text using the on-screen keyboard

- 1 To enter a character visible on the keyboard, tap the character.
- 2 To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é", touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é".

To shift between upper-case and lower-case letters

- Before you enter a letter, tap ⇧ to switch to upper-case ⬆, or vice versa.

To turn on the caps lock

- Before you type a word, touch and hold ⇧ or ⬆ until ⬆ appears.

To enter numbers or symbols

- When you enter text, tap 12!?. A keyboard with numbers and symbols appears. Tap +=& to view more options.

To enter common punctuation marks

- 1 When you finish entering a word, tap the space bar.
 - 2 Select a punctuation mark from the candidate bar. The selected mark is inserted before the space.
- 💡 To quickly enter a full stop, tap the space bar twice when you finish entering a word.

To delete characters

- Tap to place the cursor after the character you want to delete, then tap ✖.

To enter a carriage return

- When you enter text, tap ↵ to enter a carriage return.

To select text

- 1 Enter some text, then double-tap the text. The word you tap gets highlighted by tabs on both sides.
- 2 Drag the tabs left or right to select more text.

To edit text in landscape orientation

- 1 Enter some text, then double-tap the entered text.
 - 2 Select the text you want to work with, then tap **Edit** and select an option.
- ! To paste text from the clipboard, double-tap the text field to make **Paste** appear, then tap **Paste**.

To edit text in portrait orientation

- 1 Enter some text, then double-tap the entered text to make the application bar appear.
 - 2 Select the text you want to edit, then use the application bar to make your desired changes.
- ! To paste text from the clipboard, double-tap the text field to make **Paste** appear, then tap **Paste**.

Application bar

- 1 Close the application bar
- 2 Select all text
- 3 Cut text

4 Copy text

5 Paste text

only appears when you have text stored on the clipboard.

Using the Gesture input function to write words

You can input text by sliding your finger from letter to letter on the on-screen keyboard.

Gesture input is only available when you use the on-screen keyboard.

To enter text using the Gesture input function

- 1 When you enter text using the on-screen keyboard, slide your finger from letter to letter to trace the word you want to write.
- 2 Lift up your finger when you've finished entering a word. A word is suggested based on the letters you have traced. If necessary, select the correct word in the candidate bar.
- 3 To view more options, scroll right or left in the word candidate bar. If you cannot find the desired word, tap once to delete the entire word. Then try again to trace the word using the Gesture input function, or tap each letter to enter the word.
- 4 If the **Space between gestures** setting is activated, trace the next word that you want to enter. If not, tap the space bar and then trace the next word you want to enter.

To enter joined compound words when the **Space between gestures** setting is activated, you may need to slide to enter the first part of the word, then tap each letter to enter the rest of the word.

To change the Gesture input settings

- 1 When you enter text using the on-screen keyboard, tap .
- 2 Tap , then tap **Keyboard settings**.
- 3 Tap **Text input settings**.
- 4 Mark or unmark the **Gesture input** checkbox.
- 5 If you want to automatically add a space between gestures without having to tap the space bar each time, mark the **Space between gestures** checkbox.

Phonepad

The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

Using the Phonepad

- 1 Choose a text input option
- 2 Change the character case and turn on the caps lock
- 3 Display numbers

- 4 Display symbols and smileys
- 5 Enter a space
- 6 Enter a carriage return or confirm text input
- 7 Delete a character before the cursor

! All illustrations are for illustration purposes only and may not accurately depict the actual device.

To open the Phonepad for the first time

- 1 Tap a text entry field, then tap ¹²!?
- 2 Tap ✕, then tap **Keyboard settings**.
- 3 Tap **Keyboard appearance > Keyboard layout**.
- 4 Select the Phonepad.

💡 The Phonepad can only be used in portrait mode.

To enter text using the Phonepad

- When  appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap ▶ to view more word suggestions and select a word from the list.
- When  appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep pressing this key until the desired character is selected. Then do the same for the next character you want to enter, and so on.

To enter numbers using the Phonepad

- When the Phonepad is open, tap ¹²³. A Phonepad with numbers appears.

To insert symbols and smileys using the Phonepad

- 1 When the Phonepad is open, tap &😊. A grid with symbols and smileys appears.
- 2 Scroll up or down to view more options. Tap a symbol or smiley to select it.

Keyboard and Phonepad settings

You can select settings for the on-screen keyboard and the Phonepad, such as writing language and automatic correction.

To access the on-screen keyboard and Phonepad settings

- 1 When you enter text using the on-screen keyboard or Phonepad, tap ¹²!?
- 2 Tap ✕, then tap **Keyboard settings**.

To add a writing language for text input

- 1 When you enter text using the on-screen keyboard or Phonepad, tap ¹²!?
- 2 Tap ✕, then tap **Keyboard settings**.
- 3 Tap **Languages > Writing languages** and mark the relevant checkboxes. Tap **OK** to confirm.

Text input settings

When entering text using the on-screen keyboard or the Phonepad, you can access a text input settings menu that helps you set options for text prediction, automatic spacing and quick fixes. For example, you can decide how word options are presented and how words get corrected as you type. You can also set the text input application to remember new words that you write.

To change the text input settings

- 1 When you enter text using the on-screen keyboard or the Phonepad, tap  or  or .
- 2 Tap , then tap **Keyboard settings** > **Text input settings** and select the relevant settings.

Entering text using voice input

When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from Google™, and is available for a number of languages and regions.

To enable voice input

- 1 When you enter text using the on-screen keyboard or the Phonepad, tap  or .
- 2 Tap , then tap **Keyboard settings**.
- 3 Mark the **Google voice typing key** checkbox.
- 4 Press  to save your settings. A microphone icon  appears on your on-screen keyboard or Phonepad.

To enter text using voice input

- 1 Open the on-screen keyboard or the Phonepad.
- 2 If  is available, tap it. If not, touch and hold the input language key, for example, **EN** .
- 3 When  appears, speak to enter text. When you're finished, tap  again. The suggested text appears.
- 4 Edit the text manually if necessary.

Calling

Making calls

Call handling overview

- 1 View your contacts
- 2 View your call log entries
- 3 View your favourite contacts
- 4 View all contact groups saved to your device
- 5 Delete a number
- 6 Dialpad
- 7 Hide or clear the call log
- 8 Call button
- 9 Hide or show the dialer

To make a call by dialling

- 1 From your **Home screen**, tap .
- 2 Find and tap **Phone**.
- 3 Enter the number of the recipient and tap **Call**. To delete a number, tap .

To make a call using smart dial

- 1 From your **Home screen**, tap .
- 2 Find and tap **Phone**.
- 3 Use the dialpad to enter letters or numbers that correspond to the contact you want to call. As you enter each letter or number, a list of possible matches appears.
- 4 Tap the contact you want to call.

To make an international call

- 1 From your **Home screen**, tap .
- 2 Find and tap **Phone**.
- 3 Touch and hold 0 until a “+” sign appears.
- 4 Enter the country code, area code (without the first 0) and phone number, then tap **Call**.

Showing or hiding your phone number

You can select to show or hide your phone number on call recipients' devices when you call them.

To show or hide your phone number

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Call settings** > **Additional settings** > **Caller ID**.

Receiving calls

To answer a call

To decline a call

To mute the ringtone for an incoming call

- When you receive the call, press the volume key.

Rejecting a call with a message

You can reject a call with a predefined message. When you reject a call with such a message, the message is automatically sent to the caller and saved on your device.

Six messages are predefined on your device. You can select from these predefined messages, which can also be edited if necessary.

To reject a call with a predefined message

- Drag **Reject with message** upward, then select a message.

To reject a second call with a predefined message

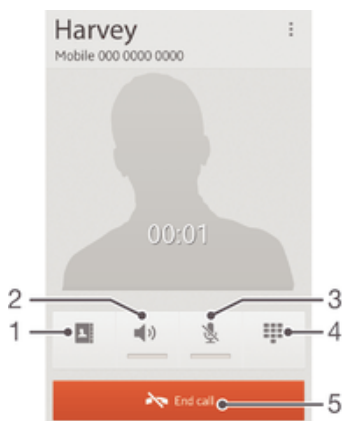

- When you hear repeated beeps during a call, drag **Reject with message** upward, then select a message.

To edit the message used to reject a call

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Call settings** > **Reject call with message**.
- 3 Tap the message you want to edit, then make the necessary changes.
- 4 When you're done, tap **OK**.

Ongoing calls

Ongoing calls overview

| | |
|---|-------------------------|
| 1 | View your contacts |
| 2 | Turn on the loudspeaker |
| 3 | Mute the microphone |
| 4 | Enter numbers |
| 5 | End a call |

To change the ear speaker volume during a call

- Press the volume key up or down.

To activate the screen during a call

- Briefly press .

Using the call log

In the call log, you can view missed calls , received calls  and dialled calls .

To view your missed calls

- 1 When you have missed a call,  appears in the status bar. Drag the status bar downwards.
- 2 Tap **Missed call**.

To call a number from your call log

- 1 From your **Home screen**, tap .
- 2 Find and tap **Phone**. The call log view appears on the upper part of the screen.
- 3 To call a number directly, tap the number. To edit a number before calling, touch and hold the number, then tap **Edit number before call**.

- ! You can also call a number by tapping  > **Call back**.

To add a number from the call log to your contacts

- 1 From your **Home screen**, tap .
- 2 Find and tap **Phone**. The call log view appears on the upper part of the screen.
- 3 Touch and hold the number, then tap **Add to Contacts**.
- 4 Tap the desired contact, or tap **Create new contact**.
- 5 Edit the contact details and tap **Done**.

To hide call logs

- 1 From your **Home screen**, tap .
- 2 Find and tap  > .
- 3 Tap **Hide call log** to hide call logs.

Forwarding calls

You can forward calls, for example, to another phone number, or to an answering service.

To forward calls

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Call settings** > **Call forwarding**.
- 3 Select an option.
- 4 Enter the number you want to forward the calls to, then tap **Enable**.

To turn off call forwarding

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings** > **Call settings** > **Call forwarding**.
- 3 Select an option, then tap **Disable**.

Restricting calls

You can bar all or certain categories of incoming and outgoing calls and if you have received a PIN2 code from your service provider, you can use a list of Fixed Dialling Numbers (FDNs) to restrict outgoing calls.

To bar incoming or outgoing calls

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call settings > Call blocking**.
- 3 Select an option.
- 4 Enter the password and tap **Enable**.

! When you use call barring for the first time, you need to enter your PUK (Personal Unblocking Key) and then a new password to activate the call barring function.

To enable or disable fixed dialling

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call settings > Fixed dialling numbers**.
- 3 Tap **Activate fixed dialling** or **Deactivate fixed dialling**.
- 4 Enter your PIN2 and tap **OK**.

To access the list of accepted call recipients

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Call settings > Fixed dialling numbers > Fixed dialling numbers**.

Multiple calls

If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

To activate or deactivate call waiting

- 1 From the **Home screen**, tap .
- 2 Find and tap **Settings > Call settings > Additional settings**.
- 3 To activate or deactivate call waiting, tap **Call waiting**.

To answer a second call and put the ongoing call on hold

- When you hear repeated beeps during a call, tap .

To reject a second call

- When you hear repeated beeps during a call, tap .

To make a second call

- 1 During an ongoing call, tap **Dialpad**.
- 2 Enter the number of the recipient and tap **Call**.
- 3 The first call is put on hold.

To switch between multiple calls

- To switch to another call and put the current call on hold, tap .

Conference calls

With a conference or multiparty call, you can have a joint conversation with two or more persons.

! For details about the number of participants that you can add to a conference call, contact your network operator.

To make a conference call

- 1 During an ongoing call, tap **Dialpad**.
- 2 Dial the number of the second participant and tap **Call**. After the second participant answers, the first participant is put on hold.
- 3 Tap ➤ to add the second participant to the conference call.
- 4 Repeat steps 1 to 3 to add more call participants.

To have a private conversation with a conference call participant

- 1 During an ongoing conference call, tap **{0} participants**.
- 2 Tap the telephone number of the participant with whom you want to talk privately.
- 3 To end the private conversation and return to the conference call, tap ➤.

To release a participant from a conference call

- 1 During an ongoing conference call, tap the button showing the number of participants. For example, tap **3 participants** if there are three participants.
- 2 Tap  next to the participant you want to release.

To end a conference call

- During the conference call, tap **End conference call**.

Vicemail

If your subscription includes a voicemail service, callers can leave voice messages for you when you can't answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

To enter your voicemail number

- 1 From the Home screen, tap .
- 2 Find and tap **Settings > Call settings > Voicemail > Voicemail settings > Voicemail number**.
- 3 Enter your voicemail number.
- 4 Tap **OK**.

To call your voicemail service

- 1 From your Home screen, tap .
- 2 Find and tap **Phone**.
- 3 Touch and hold **1**.

Emergency calls

Your device supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted if you are within range of a network.

To make an emergency call

- 1 From your Home screen, tap .
- 2 Find and Tap **Phone**.
- 3 Enter the emergency number and tap **Call**. To delete a number, tap .

- 💡 You can make emergency calls when no SIM card is inserted or when outgoing calls are barred.

To make an emergency call while the SIM card is locked

- 1 Tap **Emergency call**.
- 2 Enter the emergency number and tap **Call**. To delete a number, tap .

Contacts

Transferring contacts

There are several ways to transfer contacts to your new device. Find out more about choosing a transfer method at www.sonymobile.com/support.

Transferring contacts using a computer

Contacts Setup is an application within PC Companion and within Sony™ Bridge for Mac that helps you to collect the contacts from your old device and transfer them to your new device. Contacts Setup supports several device brands, including iPhone, Samsung, HTC and Nokia.

You need:

- An Internet-connected computer.
- A USB cable for your old device.
- A USB cable for your new Android™ device.
- Your old device.
- Your new Android™ device.

To transfer contacts to your new device using a computer

- 1 Make sure that *PC Companion* is installed on your PC or that *Sony™ Bridge for Mac* is installed on your Apple® Mac® computer.
- 2 Open the PC Companion application or the Sony™ Bridge for Mac application, then click *Contacts Setup* and follow the instructions to transfer your contacts.

Synchronising and transferring contacts using an online account

If you sync the contacts in your old device or your computer with an online account, for example, Google Sync™, Facebook™ or Microsoft® Exchange ActiveSync®, you can transfer your contacts to your new device using that account.

To synchronise contacts to your new device using a synchronisation account

- 1 From your **Home screen**, tap , then tap .
- 2 Tap , then tap **Settings > Accounts & sync**.
- 3 To sync your contacts, tap the account, then tap , and tap **Sync now**.

Other methods for transferring contacts

Refer to the User guide of your old device for information about how to copy contacts to a memory card, save contacts to a SIM card or initiate a transfer of contacts using Bluetooth®.

To import contacts from a memory card

- ! If you want to have your contacts safely backed up and accessible from any device, make sure to set up a Google™ account before importing contacts to your new device.
- 1 From your **Home screen**, tap , then tap .
 - 2 Press , then tap **Import contacts > SD card**.
 - 3 Select where to store your contacts.
 - 4 Select the file you want to import.

To import contacts using Bluetooth® technology

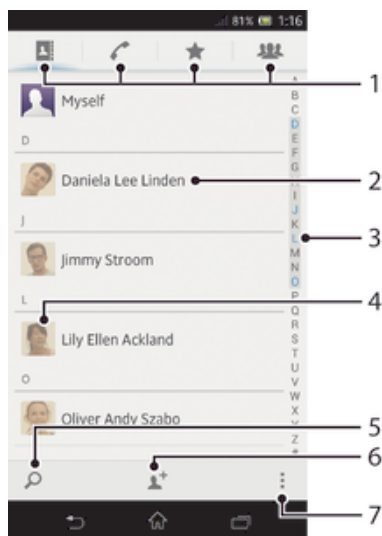

- ! If you want to have your contacts safely backed up and accessible from any device, make sure to set up a Google™ account before importing contacts to your new device.
- 1 Make sure you have the Bluetooth® function turned on and your device set to visible.
- 2 When you are notified of an incoming file to your device, drag the status bar downwards and tap the notification to accept the file transfer.
- 3 Tap **Accept** to start the file transfer.
- 4 Drag the status bar downwards. When the transfer is complete, tap the notification.
- 5 Tap the received file and select where to store your contacts.

To import contacts from a SIM card

- ! You may lose information, or get multiple contact entries if you transfer contacts using a SIM card.
- 1 From your **Home screen**, tap , then tap  .
- 2 Tap , then tap **Import contacts > SIM card**.
- 3 Select where to store your contacts.
- 4 To import an individual contact, find and tap the contact. To import all contacts, tap **Import all**.

Searching and viewing contacts

Contacts screen overview

- | | |
|---|--|
| 1 | Contacts, Calling, Favourites and Groups tabs |
| 2 | View contact details |
| 3 | Jump to contacts starting with the selected letter |
| 4 | Access communication options for the contact |
| 5 | Search for contacts |
| 6 | Add a contact |
| 7 | View more options |

To search for a contact

- 1 From your **Home screen**, tap , then tap  .
- 2 Tap  and enter the first few letters of the contact name in the **Search contacts** field. All contacts beginning with those letters appear.

To select which contacts to display in the Contacts application

- 1 From your **Home screen**, tap , then tap .
- 2 Press , then tap **Filter**.
- 3 In the list that appears, mark and unmark the desired options. If you have synchronised your contacts with a synchronisation account, that account appears in the list. To further expand the list of options, tap the account.
- 4 When you are finished, tap **OK**.

Adding and editing contacts

To add a contact

- 1 From your **Home screen**, tap , then tap .
 - 2 Tap .
 - 3 If you have synchronised your contacts with one or more accounts, select the account to which you want to add this contact, or tap **Phone contact** if you only want to use this contact on your device.
 - 4 Enter or select the desired information for the contact.
 - 5 When you are finished, tap **Done**.
-  If you add a plus sign and the country code before a contact's phone number, you do not have to edit the number again when you make calls from other countries.

To edit a contact

- 1 From your **Home screen**, tap , then tap .
 - 2 Tap the contact you want to edit, then tap .
 - 3 Edit the desired information. When you are finished, tap **Done**.
-  Some synchronisation services, for example, some social networking services, do not allow you to edit contact details.

To associate a picture with a contact

- 1 From your **Home screen**, tap , then tap .
 - 2 Tap the contact you want to edit, then tap .
 - 3 Tap  and select the desired method for adding the contact picture.
 - 4 When you have added the picture, tap **Done**.
-  You can also add a picture to a contact directly from the **Album** application.

To delete contacts

- 1 From your **Home screen**, tap , then tap .
- 2 Touch and hold the contact you want to delete. To delete all contacts, press , then tap **Mark several**.
- 3 Tap the downwards arrow to open the drop down menu, then select **Mark all**.
- 4 Tap , then tap **OK**.

To edit contact information about yourself

- 1 From your **Home screen**, tap , then tap .
- 2 Tap **Myself**, then tap .
- 3 Enter the new information or make the changes you want.
- 4 When you are done, tap **Done**.

To create a new contact from a text message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap  > **Save**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information and tap **Done**.

Favourites and groups

You can mark contacts as favourites so that you can get quick access to them from the Contacts application. You can also assign contacts to groups, to get quicker access to them from within the Contacts application.

To mark or unmark a contact as a favourite

- 1 From the **Home screen**, tap , then tap .
- 2 Tap the contact you want to add to or remove from your favourites.
- 3 Tap .

To view your favourite contacts

- 1 From your **Home screen**, tap , then tap .
- 2 Tap .

To assign a contact to a group

- 1 In the Contacts application, tap the contact that you want to assign to a group.
- 2 Tap , then tap the bar directly under **Assign to group**.
- 3 Mark the checkboxes for the groups to which you want to add the contact, then tap **Done**.
- 4 Tap **Done**.

Sending contact information

To send your business card

- 1 From your **Home screen**, tap , then tap .
- 2 Tap **Myself**.
- 3 Press , then tap **Send contact > OK**.
- 4 Select an available transfer method and follow the on-screen instructions.

To send a contact

- 1 From your **Home screen**, tap , then tap .
- 2 Tap the contact whose details you want to send.
- 3 Press , then tap **Send contact > OK**.
- 4 Select an available transfer method and follow the on-screen instructions.

To send several contacts at once

- 1 From your **Home screen**, tap , then tap .
- 2 Press , then tap **Mark several**.
- 3 Mark the contacts you want to send, or select all if you want to send all contacts.
- 4 Tap , then select an available transfer method and follow the on-screen instructions.

Avoiding duplicate entries in the Contacts application

If you synchronise your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

To link contacts

- 1 From your **Home screen**, tap , then tap .
- 2 Tap the contact you want to link with another contact.
- 3 Press , then tap **Link contact**.
- 4 Tap the contact whose information you want to join with the first contact, then tap **OK** to confirm. The information from the first contact is merged with the second contact, and the first contact is no longer displayed in the Contacts list.

To separate linked contacts

- 1 From your **Home screen**, tap , then tap .
- 2 Tap the linked contact you want to edit, then tap .
- 3 Tap **Unlink contact**.
- 4 Tap **OK**.

Backing up contacts

You can use internal storage or a SIM card to back up contacts.

To export all contacts to the phone's internal storage

- 1 From your **Home screen**, tap , then tap .
- 2 Press , then tap **Export contacts > Internal storage**.
- 3 Tap **OK**.

To export contacts to a SIM card

- 1 From your **Home screen**, tap , then tap .
- 2 Press , then tap **Export contacts > SIM card**.
- 3 Mark the contacts you want to export, or tap **Mark all** if you want to export all your contacts.
- 4 Tap **Export**.
- 5 Select **Add contacts** if you want to add the contacts to existing contacts on your SIM card, or select **Replace all contacts** if you want to replace the existing contacts on your SIM card.

- ! When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.

To export all contacts to the USB storage

- 1 From your **Home screen**, tap , then tap .
- 2 Press , then tap **Export contacts > USB storage**.
- 3 Tap **OK**.

Messaging

Using text and multimedia messaging

You can send and receive text messages from your device using SMS (Short Message Service). If your subscription includes MMS (Multimedia Messaging Service), you can also send and receive messages that contain media files, for example, pictures and videos. The number of characters you can send in a single text message varies depending on the operator and the language you use. If you exceed the character limit, then all your single messages are linked together and sent as one message. You are charged for each single text message you send. When you view your messages, they appear as conversations, which means that all messages to and from a particular person are grouped together.

- ! To send multimedia messages, you need the correct MMS settings on your device. See *Internet and messaging settings*.

To create and send a message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap .
- 3 Tap , then select the desired recipients from the Contacts list. If the recipient is not listed as a contact, enter the contact's number manually and tap .
- 4 When you are finished adding recipients, tap **Done**.
- 5 Tap **Write message** and enter your message text.
- 6 If you want to add a media file, tap  and select an option.
- 7 To send the message, tap **Send**.

- 💡 If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word **Draft**.

To read a received message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap the desired conversation.
- 3 If the message is not yet downloaded, tap and hold the message, then tap **Download message**.

- 💡 You can also open messages from the status bar when  appears there. Just drag down the bar and tap the message.

To reply to a message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap the conversation containing the message.
- 3 Enter your reply and tap **Send**.

To forward a message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap the conversation containing the message you want to forward.
- 3 Touch and hold the message you want to forward, then tap **Forward message**.
- 4 Tap , then select a recipient from the Contacts list. If the recipient is not listed as a contact, enter the contact's number manually and tap .
- 5 When you are finished adding recipients, tap **Done**.
- 6 Edit the message, if necessary, and tap **Send**.

- 💡 In step 4, you can also tap **To** and enter the recipient's phone number manually.

To delete a message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap the conversation containing the message you want to delete.
- 3 Touch and hold the message you want to delete, then tap **Delete message** > **Delete**.

To delete conversations

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Delete conversations**.
- 3 Mark the checkboxes for the conversations that you want to delete, then tap  > **Delete**.

To create a new contact from a text message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap  > **Save**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information and tap **Done**.

To call a message sender

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap a conversation.
- 3 Tap the recipient name or number at the top of the screen, then select the recipient name or number from the list that appears.
- 4 If the recipient is saved in your contacts, tap the phone number that you want to call. If you have not saved the recipient in your contacts, tap .

To save a file contained in a message you receive

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap the conversation you want to open.
- 3 If the message has not been downloaded yet, tap and hold the message, then tap **Download message**.
- 4 Touch and hold the file you want to save, then select the desired option.

To star a message

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap the conversation you want to open.
- 3 In the message you want to star, tap .
- 4 To unstar a message, tap .

To view starred messages

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Starred messages**.
- 3 All starred messages appear in a list.

To search for messages

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Search**.
- 3 Enter your search keywords, then tap the confirm key.

Text and multimedia message options

To change your message notification settings

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Settings**.
- 3 To set a notification sound, tap **Notification tone** and select an option.
- 4 For other notification settings, check or uncheck the relevant checkboxes.

To change the delivery report settings for outgoing messages

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Settings**.
- 3 Tap **Delivery report** to activate or deactivate delivery reports.

To view messages saved on the SIM card

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap , then tap **Settings** > **SIM messages**.

Google Talk™

The Google Talk™ application lets you chat with your friends using text, voice and video.

To start Google Talk™

- 1 From your Home screen, tap .
- 2 Find and tap Talk.

To reply to an instant message with Google Talk™

- 1 When someone contacts you on Google Talk™,  appears in the status bar.
- 2 Drag the status bar downwards, then tap the message and begin to chat.

Email

Getting started with Email

You can handle several email accounts at the same time using the Email application, including corporate Microsoft Exchange Active Sync accounts. Emails you receive to your Gmail™ account can be accessed on your device from both the Email and the Gmail™ applications.

Using email accounts

To set up an email account on your device

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Email**.
 - 3 Follow the instructions that appear on the screen to complete the setup.
-  For some email services, you may need to contact your email service provider for information on detailed settings for the email account.

To set an email account as your default account

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Email**.
 - 3 Press , then tap **Settings**.
 - 4 Select the account you want to use as the default account for composing and sending emails.
 - 5 Mark the **Default account** checkbox. The inbox of the default account appears every time you open the email application.
-  If you only have one email account, this account is automatically the default account.

To add an extra email account on your device

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 Tap  at the top of the screen, then tap **Add account**.
- 4 Enter the email address and password, then tap **Next**. If the settings for the email account cannot be downloaded automatically, complete the setup manually.
- 5 When prompted, enter a name for your email account so that it is easily identifiable. The same name shows in the emails you send from this account.
- 6 When you are finished, tap **Next**.

To remove an email account from your device

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 Press , then tap **Settings**.
- 4 Select the account you want to remove.
- 5 Tap **Delete account** > **OK**.

To open the Gmail™ application

- 1 From the **Home screen**, tap .
- 2 Find and tap **Gmail**.

Using email

To create and send an email message

- 1 Make sure that you have set up an email account.
- 2 From your **Home screen**, tap , then find and tap **Email**.
- 3 If you are using several email accounts, tap  at the top of the screen and select the account that you want to use.
- 4 Tap , then tap **To** and start typing the recipient's name or email address, or tap  and select one or more recipients from your **Contacts list**.
- 5 Enter the email subject and message text, then tap .

To receive email messages

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Email**.
 - 3 If you are using several email accounts, tap  at the top of the screen and select the account that you want to check. If you want to check all your email accounts at once, tap **Combined view**.
 - 4 To download new messages, tap .
-  If you have set up a corporate email account, you can set the check frequency to **Automatic (Push)**.

To read your email messages

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 If you are using several email accounts, tap  at the top of the screen and select the account you want to check. If you want to check all your email accounts at once, tap **Combined view**.
- 4 In the email inbox, scroll up or down and tap the email you want to read.

To use the email preview pane

- 1 From your **Home screen**, tap .
 - 2 If you are using several email accounts, tap  and select the account you want to check. If you want to check all your email accounts at once, tap **Combined view**.
 - 3 Hold your device horizontally. The email preview pane appears.
 - 4 Scroll up or down in the email inbox and tap the email you want to read. The email opens in the preview pane. To view more information about the email, tap the downward arrow next to the sender's name. In the body text field, pinch two fingers together, or spread them apart, to zoom out or in.
 - 5 To view the email in fullscreen format, tap the split bar (located between the email list and email body) accordingly. In fullscreen format, use the leftward and rightward arrows to read your previous or next message.
 - 6 To return to the inbox view, tap the split bar accordingly.
-  Before using the preview pane, activate it in the preview pane settings.
-  To hide the preview pane, hold your device vertically, or change the preview pane settings.

To change email preview pane settings

- 1 From your **Home screen**, tap .
- 2 Press , then tap **Settings**.
- 3 Tap **General > Preview pane**, then select an option.

To view an email message attachment

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 Find and tap the email message containing the attachment that you want to view. Emails with attachments are indicated by .
- 4 After the email message opens, tap , then tap **View**.

To save a sender's email address to your contacts

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 Find and tap a message in your email inbox.
- 4 Tap the name of the sender, then tap **OK**.
- 5 Select an existing contact, or tap **Create new contact**.
- 6 Edit the contact information, if desired, then tap **Done**.

To reply to an email message

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 In your email inbox, find and tap the message you want to reply to, then tap .
- 4 Tap **Reply** or **Reply all**.
- 5 Enter your reply, then tap .

To forward an email message

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 In your email inbox, find and tap the message you want to forward, then tap .
- 4 Tap **Forward**.
- 5 Tap **To** and enter the recipient's email address manually, or tap  to select a recipient from your contacts.
- 6 Enter your message text, then tap .

To delete an email message

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 In your email inbox, find and tap the message you want to delete, then tap .
- 4 Tap **Yes**.

To sort your emails

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 If you are using several email accounts, tap  at the top of the screen and select the account that you want to check. If you want to check all your email accounts at once, tap **Combined view**.
- 4 Press , then tap **Sort**.
- 5 Select a sorting option.

To search for emails

- 1 From your **Home screen**, tap , then find and tap **Email**.
- 2 Tap  at the top of the screen and select the account that you want to search.
- 3 Tap .
- 4 Enter your search text, then tap **Go** on your keyboard.
- 5 The search result appears in a list sorted by date. Tap the email that you want to open.

-  To change search options, tap  and select a different option.

To view all folders for one email account

- 1 From your **Home screen**, tap . Then find and tap **Email**.
- 2 Tap  at the top of the screen and select the account you want to check, then tap  again and select **Show all folders** to view all the folders in this account.

To change the inbox check frequency

- 1 From your **Home screen**, tap .
- 2 Find and tap **Email**.
- 3 Press , then tap **Settings**.
- 4 Select the account for which you want to change the inbox check frequency.
- 5 Tap **Inbox check frequency** and select an option.

To set an Out of Office auto-reply in an Exchange Active Sync account

- 1 From your Home screen, tap , then find and tap **Email**.
- 2 Press , then tap **Settings**.
- 3 Select the EAS (Exchange Active Sync) account for which you want to set an Out of Office auto-reply.
- 4 Tap **Out of office**.
- 5 Tap beside **Out of office** so that changes to .
- 6 If needed, mark the **Set time range** checkbox and set the time range for the auto reply.
- 7 Enter your Out of Office message in the body text field.
- 8 Tap **OK** to confirm.

Socialife™

Using the Socialife™ application

Use the Socialife™ application from Sony to get your favourite news, videos and social networking feeds in one place. The Socialife™ home screen gives a clear overview of friends' Facebook and Twitter activity, plus news feeds that you have subscribed to. It colour-codes and sizes articles for easy reading, adding photos and cropping images of your friends' faces to illustrate each story.

- ! The Socialife™ application is not available in all markets.

To open the Socialife™ application

- 1 From your Home screen, tap .
- 2 Find and tap .

"WALKMAN" application

About the "WALKMAN" application

Get the most out of your "WALKMAN" application. Listen to and organise music and audio books that you have transferred to your device from a computer, or purchased and downloaded from online stores.

To make content easily available to the "WALKMAN" application, you can use the Media Go™ application. Media Go™ helps transfer music content between a computer and your device. For more information, see *Connecting your device to a computer* on page 101.

"WALKMAN" application overview

- 1 Browse your music
- 2 Search all tracks saved on your device
- 3 Tap the infinite button to find related information online and plug-ins on Google Play™
- 4 Album art (if available)
- 5 Go to the next track in the current play queue, or fast forward
- 6 Total time length of the track
- 7 Elapsed time of current track
- 8 Progress indicator – drag the indicator or tap along the line to fast forward or rewind
- 9 Play/Pause button
- 10 Go to the previous track in the current play queue, or rewind

Transferring media files to your device

Before using the "WALKMAN" application, it's a good idea to transfer all your favourite media content from a computer to your device and then play or view this content on your device. Media content can include music, photos and videos. The easiest way to transfer files is with a USB cable. After you connect your device and the computer using the USB cable, you can use the file manager application on the computer or the Media Go™ application to transfer the files.

Using the "WALKMAN" application

To play audio content

- 1 From your **Home screen**, tap , then find and tap .
- 2 In **My music**, select a music category and browse to the track that you want to open.
- 3 Tap a track to play it.

- ! You might not be able to play copyright-protected items. Please verify that you have necessary rights in material that you intend to share.

To change tracks

- When a track is playing, tap  or .
- When a track is playing, swipe the album art left or right.

To pause a track

- Tap .

To fast forward and rewind music

- Touch and hold  or .
- 💡 You can also drag the progress indicator marker right or left.

To control audio tracks from the lockscreen

- 1 To activate the screen, briefly press the power key .
- 2 To display the music player controls, drag  to the right across the screen.
- 3 Tap  to play, tap  to pause, tap  or  to change track.

To adjust the audio volume

- Press the volume key.

To improve the sound quality using the equaliser

- 1 When the "WALKMAN" application is open, tap .
- 2 Tap **Settings** > **Sound enhancements**.
- 3 To adjust the sound manually, drag the frequency band buttons up or down. To adjust the sound automatically, tap  and select a style.

To turn on the surround sound feature

- 1 When the "WALKMAN" application is open, tap .
- 2 Tap **Settings** > **Sound enhancements** > **Settings** > **Surround sound (VPT)**.
- 3 Select a setting, then tap **OK** to confirm.

To view the current play queue

- 1 While a track is playing in the "WALKMAN" application, tap .
- 2 Tap **Play queue**.

To minimise the "WALKMAN" application

- When the "WALKMAN" application is playing, tap  to go to the previous screen, or tap  to go to the **Home screen**. The "WALKMAN" application stays playing in the background.

To open the "WALKMAN" application when it is playing in the background

- 1 While a track is playing in the background, drag the status bar downwards to open the Notification panel.
- 2 Tap the track title to open the "WALKMAN" application.

- 💡 Alternatively, you can press  and then select the "WALKMAN" application.

To delete a track

- 1 In **My music**, browse to the track that you want to delete.
- 2 Touch and hold the track title, then tap **Delete**.

💡 You can also delete albums this way.

To send a track

- 1 In **My music**, when browsing your tracks, touch and hold a track title.
- 2 Tap **Send**.
- 3 Select an application from the list, and follow the on-screen instructions.

💡 You can also send albums and playlists in the same way.

To "Like" a track on Facebook™

- 1 While the track is playing in the "WALKMAN" application, tap the album art.
- 2 Tap  to show that you "Like" the track on Facebook™. If desired, add a comment in the comments field.
- 3 Tap **Share** to send the track to Facebook™. If the track is received successfully, you will get a confirmation message from Facebook™.

Visualiser

The Visualiser adds visual effects to your music tracks as you play them. The effects for each track are based on the characteristics of the music. They change, for example, in response to changes in the music's loudness, rhythm and frequency level. You can also change the background theme.

To turn on the Visualiser

- 1 In the "WALKMAN" application, tap .
- 2 Tap **Visualizer**.

💡 Tap  to switch to full screen view.

To change the background theme

- 1 In the "WALKMAN" application, tap .
- 2 Tap **Visualizer**.
- 3 Tap  > **Theme** and select a theme.

Getting more information about a track or artist

In the "WALKMAN" application, you can get more information about the artist that you are listening to by tapping the infinite button .

The infinite button  also gives you access to related content such as:

- Music videos on YouTube™
- Artist info on Wikipedia
- Lyrics on Google
- Karaoke videos on YouTube™
- Extension searches on the web
- Content from the PlayNow™ service

! The accuracy of search results may vary.

To get more information about an artist or track

- When a track is playing in the "WALKMAN" application, tap .

Using My music to organise your tracks

Tap the My music tab in the "WALKMAN" application to get an overview of all the tracks that are available from your device. In My music, you can manage your albums and playlists, create shortcuts, and arrange your music by mood and tempo.

Overview of My music

- 1 Go back to the current track
- 2 Picture of the currently playing artist (if available)
- 3 Browse your music by artist
- 4 Categorise your music using SensMe™ channels
- 5 Manage and edit your music using Music Unlimited™
- 6 Browse your favourite playlists
- 7 Collect links to music and related content that you and friends have shared using online services
- 8 Browse all playlists
- 9 Browse audio by track
- 10 Browse by album

To add a shortcut to a track

- 1 In **My music**, tap , , or , then browse to the track for which you want to create a shortcut.
- 2 Touch and hold the track title.
- 3 Tap **Add as shortcut**. The shortcut now appears in the **My music** main view.

To rearrange shortcuts

- In **My music**, touch and hold a shortcut until it magnifies and your device vibrates, then drag the item to a new location.

To delete a shortcut

- In **My music**, touch and hold a shortcut until it magnifies and your device vibrates, then drag the item to .
- ! You can only delete shortcuts that you create yourself.

To update your music with the latest information

- 1 In **My music**, tap .
 - 2 Tap **Download music info** > **Start**. Your device searches online and downloads the latest available album art and track information for your music.
- The SensMe™ channels application is activated when you download music information.

Categorising your music using SensMe™ channels

The SensMe™ channels application helps you arrange your music by mood and tempo. SensMe™ groups all your tracks into several categories, or channels, so you can select music that matches your mood or suits the time of day.

To enable the SensMe™ channels application

- In **My music**, tap , then tap **Download music info**.
- ! This application requires a mobile or Wi-Fi® network connection.

Using the Friends' music function to share music

The Friends' music function collects links to music and music-related content that you and your friends have shared using Facebook™.

To manage music from your friends

- 1 In **My music**, tap **Friends' music > Recent**.
- 2 Tap an item to open it, then work on it as desired.
- 3 Tap  to show that you "Like" the track on Facebook™. If desired, add a comment in the comments field.

To view your shared music

- 1 In **My music**, tap **Friends' music > My shares**.
- 2 Scroll to an item you want to open, then tap it. All comments about the item, if any, are displayed.

Playing music in random order

You can play tracks in playlists in random order. A playlist can be, for example, a playlist you have created yourself or an album.

To play tracks in random order

- 1 In **My music**, tap  and navigate to an album, or tap  and browse to a playlist.
- 2 Tap the album art, then tap  to turn on **Shuffle mode**.

To turn off shuffle mode

- When tracks are playing in random order, tap the album art > .

Managing playlists

In **My music**, you can create your own playlists from the music that is saved on your device.

In addition, you can install the Media Go™ application on a computer and use it to copy playlists from the computer to your device.

To create your own playlists

- 1 In the WALKMAN player, tap the **MY MUSIC** tab.
- 2 Tap **Playlists**.
- 3 In the menu that opens, tap **Create new playlist**.
- 4 Enter a name for the playlist and tap **OK**.
- 5 Select your music and tap the **Save** icon at the top right of the screen.

To add tracks to a playlist

- 1 In **My music**, when browsing your tracks, touch and hold the name of the artist or the title of the album or track that you want to add.
- 2 Tap **Add to**.
- 3 Tap the name of the playlist to which you want to add the artist, album or track. The artist, album or track is added to the playlist.

To play your own playlists

- 1 In **My music**, tap .
- 2 Under **Playlists**, tap a playlist.
- 3 Tap a track to play it.

To remove a track from a playlist

- 1 In a playlist, touch and hold the title of the track you want to delete.
- 2 Tap **Delete from playlist** from the list that appears.

To delete a playlist

- 1 In **My music**, then select **Playlists**.
- 2 Touch and hold the playlist you want to delete.
- 3 Tap **Delete**.
- 4 Tap **Delete** again to confirm.

- ! You cannot delete default playlists.

"WALKMAN" application widget

The "WALKMAN" application widget is a miniature application that gives you direct access to the "WALKMAN" application from your **Home screen**. You need to add this widget to your **Home screen** before you can use it.

To add the "WALKMAN" application widget to your Home screen

- 1 Tap an empty area on your **Home screen**, then tap **Widgets**.
- 2 Find and tap **WALKMAN**.

Protecting your hearing

Listening to the "WALKMAN" application or other media players at excessive volume or for a prolonged period of time can damage your hearing, even when the volume is at a moderate level. To alert you to such risks, a volume level warning appears when the volume is too high, and after the "WALKMAN" application is used for over 20 hours.

To turn off the volume level warning

- When  appears, tap **OK** to dismiss the warning.
- 💡 Every time you restart your device, the media volume is automatically set to a moderate level.

Music services

TrackID™ technology

Identifying music using TrackID™ technology

Use the TrackID™ music recognition service to identify a music track you hear playing in your surroundings. Just record a short sample of the song and you'll get artist, title and album info within seconds. You can purchase tracks identified by TrackID™ and you can view TrackID™ charts to see what TrackID™ users around the globe are searching for. For best results, use TrackID™ technology in a quiet area.

- ! The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

To open the TrackID™ application

- 1 From your **Home screen**, tap .
- 2 Find and tap **TrackID™**.

- 💡 You can also use the TrackID™ widget to open the TrackID™ application.

To search for track information using TrackID™

- 1 Open the **TrackID™** application, then hold your device towards the music source.
- 2 Tap . If the track is recognised by the TrackID™ service, the results appear on the screen.

- 💡 To return to the TrackID™ start screen, press .

To view TrackID™ charts

- 1 Open the **TrackID™** application, then tap **Charts**. The first time you view a chart, it is set to your own region.
- 2 To see charts of the most popular searches in other regions, tap  > **Regions**.
- 3 Select a country or region.

Using TrackID™ technology results

Track information appears when the TrackID™ application recognises a track. You can select to purchase the track or share it using email, SMS or a social networking service. You can also get more information about the track's artist.

To buy a track recognised by the TrackID™ application

- 1 After a track has been recognised by the **TrackID™** application, tap **Download**.
- 2 Follow the instructions on your device to complete your purchase.

- 💡 You can also select a track to buy by opening the **History** or **Charts** tabs from the TrackID™ start screen.

- ! The track purchase feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.

To share a track

- 1 After a track has been recognised by the **TrackID™** application, tap **Share**, then select a sharing method.
- 2 Follow the instructions on your device to complete the procedure.

- 💡 You can also select a track to share by opening the **History** or **Charts** tabs from the TrackID™ start screen.

To view the artist information for a track

- After a track has been recognised by the TrackID™ application, tap **Artist info**.
- 💡 You can also view the artist information for a track by opening the **History** or **Charts** tabs from the TrackID™ start screen.

To delete a track from the track history

- 1 Open the TrackID™ application, then tap **History**.
- 2 Tap a track title, then tap **Delete**.
- 3 Tap **Yes** to confirm.

Music Unlimited™

Using Music Unlimited™

Music Unlimited™ is a subscription-based service that offers access to millions of songs over a mobile network or Wi-Fi® connection. You can manage and edit your personal music library in the cloud from a variety of devices, or sync your playlists and music using a PC that runs the Windows® operating system. Go to www.sonyentertainmentnetwork.com for more information.

- ! Music Unlimited™ might not be available in all countries or regions.

To open Music Unlimited™

- 1 From your **Home** screen, tap .
- 2 Find and tap .

FM radio

About the FM radio

The FM radio in your device works like any FM radio. For example, you can browse and listen to FM radio stations and save them as favourites. You must connect a wired headset or headphones to your device before you can use the radio. This is because the headset or headphones act as an antenna. After one of these devices is connected, you can then switch the radio sound to the speaker, if desired.

- 💡 When you open the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

To start the FM radio

- 1 Connect a headset or a set of headphones to your device.
- 2 From your **Home screen**, tap .
- 3 Find and tap **FM radio** . The available channels appear as you scroll through the frequency band.

- ! When you start the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

To move between radio channels

- Flick your finger up or down along the frequency band.

To select the radio region

- 1 When the radio is open, press .
- 2 Tap **Set radio region**.
- 3 Select an option.

To adjust the visualizer

- 1 When the radio is open, tap .
- 2 Tap **Visualizer**.
- 3 Select an option.

FM radio overview

- 1 Radio on/off button
- 2 View menu options
- 3 Move up the frequency band to search for a channel
- 4 A saved favourite channel
- 5 Move down the frequency band to search for a channel
- 6 Tuning dial

Using your favourite radio channels

You can save the radio channels you most frequently listen to as favourites. By using favourites you can quickly return to a radio channel.

To save a channel as a favourite

- 1 When the radio is open, navigate to the channel that you want to save as a favourite.
- 2 Tap ☆.
- 3 Enter a name and select a colour for the channel, then press **Save**.

To remove a channel as a favourite

- 1 When the radio is open, navigate to the channel that you want to remove.
- 2 Tap ★, then tap **Delete**.

Making a new search for radio channels

If you have moved to a new location or the reception has improved in your current location, you can start a new scan for radio channels.

- ! Any favourites you have saved are not affected by a new scan.

To start a new search for radio channels

- 1 When the radio is open, press ⋮.
- 2 Tap **Search for channels**. The radio scans the whole frequency band, and all available channels are displayed.

Sound settings

Switching the radio sound between devices

You can listen to the radio through a wired headset or through wired headphones. Once either device is connected, you can switch the sound to the speaker, if desired.

To switch the radio sound to the speaker

- 1 When the radio is open, press ⋮.
 - 2 Tap **Play in speaker**.
- 💡 To switch the sound back to the wired headset or headphones, press ⋮ and tap **Play in headphones**.

Switching between mono and stereo sound mode

You can listen to your FM radio in either mono or stereo mode. In some situations, switching to mono mode can reduce noise and improve sound quality.

To switch between mono and stereo sound mode

- 1 When the radio is open, press ⋮.
- 2 Tap **Enable stereo sound**.
- 3 To listen to the radio in mono sound mode again, press ⋮ and tap **Force mono sound**.

Identifying radio tracks using TrackID™

Use TrackID™ technology to identify music tracks as they play on your device's FM radio.

To identify a song on the FM radio using TrackID™

- 1 While the song is playing on your device's FM radio, tap **TrackID™**.
 - 2 A progress indicator appears while the TrackID™ application samples the song. If successful, you are presented with a track result or a list of possible tracks.
 - 3 Press ↶ to return to the FM Radio.
- ! The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

Camera

About the camera

The camera in your device is equipped with the highly sensitive Exmor R sensor, which helps you capture sharp photos and videos even in low lighting conditions. From the camera, you can, for example, send your photos and videos to friends as messages, or upload them to a web service. Your device also has a front camera, which is useful for self-portraits.

Camera controls overview

[Missing image]

- 1 Zoom in or out
- 2 Main camera screen
- 3 Camera key – Activate the camera/Take photos/Record videos
- 4 View photos and videos
- 5 Take photos or record video clips
- 6 Go back a step or exit the camera
- 7 Switch between front and main camera
- 8 Camera setting icons
- 9 Front camera

To open the camera

- When the screen is active, press and hold down the camera key.

To close the camera

- Press ↶ from the main camera screen.

To activate the camera from the lockscreen

- 1 To activate the screen, briefly press the power key (⏻).
- 2 To activate the camera controls, drag 📷 to the left across the screen.
- 3 Tap 📷.

Using the still camera

There are three ways to take photos with the still camera. You can press the camera key, tap the on-screen camera button, or touch a spot on the screen.

To take a photo using the camera key

- 1 Activate the camera.
- 2 Press the camera key fully down.

To take a photo by tapping the on-screen camera button

- 1 Activate the camera.
- 2 Point the camera towards the subject.
- 3 Tap the on-screen camera button . The photo is taken as soon as you release your finger.

To take a self-portrait using the front camera

- 1 Activate the camera.
- 2 Tap the icon on the top left of the screen, then find and select **Front camera**.
- 3 To take the photo, press the camera key. The photo is taken as soon as you release your finger.

To use the zoom function

- When the camera is open, press the volume key up or down to zoom in or out.

To view your photos and videos

- 1 Open the camera, then tap a thumbnail at the top right of the screen to open a photo or video.
- 2 Flick left or right to view your photos and videos. Videos are identified by .

To delete a photo

- 1 Open the photo that you want to delete.
- 2 Tap an empty area of the screen to make  appear.
- 3 Tap .
- 4 Tap **OK** to confirm.

Face detection

You can use face detection to bring an off-centre face into focus. The camera automatically detects up to five faces, indicated by white frames. A yellow frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

To turn on face detection

- 1 Activate the camera.
- 2 Tap the icon on the top left of the screen, then select **Normal**.
- 3 To display all settings, tap .
- 4 Tap **Focus mode > Face detection**.

To take a photo using face detection

- 1 When the camera is open and **Face detection** turned on, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
- 2 Press the camera key halfway down. A yellow frame shows which face is in focus.
- 3 To take the photo, press the camera key fully down.

Using Smile Shutter™ to capture smiling faces

Use Smile Shutter™ technology to photograph a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto focus. When the selected face smiles, the camera automatically takes a photo.

To turn on Smile Shutter™

- 1 Activate the camera.
- 2 To display all settings, tap .
- 3 Tap **Smile Shutter** and select a smile level.

To take a photo using Smile Shutter™

- 1 When the camera is open and Smile Shutter is turned on, point the camera at your subject. The camera selects which face to focus on.
- 2 The face selected appears inside a green frame and the photo is taken automatically.
- 3 If no smile is detected, press the camera key to take the photo manually.

Adding the geographical position to your photos

Turn on geotagging to add the approximate geographical location (a geotag) to photos when you take them. The geographical location is determined either by wireless networks (mobile or Wi-Fi® networks) or GPS technology.

When  appears on the camera screen, geotagging is turned on but the geographical position has not been found. When  appears, geotagging is turned on and the geographical location is available, so your photo can get geotagged. When neither of these two symbols appears, geotagging is turned off.

To turn on geotagging

- 1 Activate the camera.
- 2 Tap , then tap **Geotagging > On**.
- 3 Tap **OK** to agree to enable GPS and/or wireless networks.
- 4 Check the options that you want to select under **Location services**.
- 5 After you confirm your settings, press  to return to the camera screen.
- 6 If  appears on the camera screen, your location is available and your photo can get geotagged. If not, check your GPS and/or wireless network connection.

Using still camera settings

To adjust the still camera settings

- 1 Activate the camera.
- 2 To display all settings, tap .
- 3 Select the setting that you want to adjust, then edit as desired.

To customise the still camera settings panel

- 1 When the camera is open, tap  to display all settings.
 - 2 Touch and hold the setting you want to move and drag it to the desired position.
-  If you drag the setting outside of the settings panel, the change is cancelled.

Still camera settings overview

-  **Superior auto**
Optimise your settings to suit any scene.
-  **Burst**
Use the Burst speed shooting mode to capture several photos in quick succession by keeping your finger pressed on the shutter button. You can choose between three burst speeds, which come with different resolution levels, that is, different picture sizes.
-  **Normal**
-  **Front camera**
Select the front camera if you want to take self-portrait photos.
-  **Picture effect**
Apply effects to photos.
-  **Scene selection**
Use a pre-programmed scene type to quickly set the camera for common situations.
-  **Sweep Panorama**

Use this setting to take wide-angle, panoramic photos. Just press the camera key and move the camera steadily from one side to the other.

Resolution

Choose between several picture sizes and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

-  **13 MP 4:3**
13 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution. 13MP is available in the following conditions: select Normal capturing mode and HDR is off; select Scene mode except in Backlight Correction HDR mode.
-  **12 MP 4:3**
12 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution. 12MP is maximum resolved in Superior Auto mode.
-  **9 MP 16:9**
9 megapixel picture size with 16:9 aspect ratio. A high resolution widescreen format. Has a higher resolution than full HD. Suitable for photos you want to view on widescreen displays.
-  **5MP 4:3**
5 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.
-  **2MP 16:9**
2 megapixel picture size with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.
-  **VGA**
VGA format with 4:3 aspect ratio. 640x480 pixels.

- ! 12 MP is the maximum resolution available when photos are taken using **Superior auto mode**; when HDR is turned on in **Normal mode**; or when **Scenes (Backlight correction HDR mode)** mode is selected.
- ! The 13 MP resolution is only available when **Normal capturing mode** is selected and HDR is turned off, and when **Scenes mode** is selected (except in **Backlight correction HDR mode**).

Self-timer

With the self-timer you can take a photo without holding the device. Use this function to take self-portraits, or group photos where everyone can be in the photo. You can also use the self-timer to avoid shaking the camera when taking photos.

-  **On (10 sec.)**
Set a 10-second delay from when you tap the camera screen until the photo is taken.
-  **On (2 sec.)**
Set a 2-second delay from when you tap the camera screen until the photo is taken.
-  **Off**
The photo is taken as soon as you tap the camera screen.

Smile Shutter™

Use the smile shutter function to determine what kind of smile the camera reacts to before taking a photo.

Quick launch

Use Quick launch settings to launch the camera from the lock screen. If the device is in sleep mode of camera, press the camera key.

-  **Launch and capture**
By pressing and holding down the camera key, the first photo is captured immediately after the camera is launched from sleep mode.
-  **Launch only (still camera)**
By pressing and holding down the camera key, the still camera is launched from sleep mode.

 **Launch and record video**
By pressing and holding down the camera key, the first video is shot immediately after the camera video camera is launched from sleep mode.

 **Launch only (video camera)**
By pressing and holding down the camera key, the video camera is launched from sleep mode.

 **Off**

Focus mode

The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the yellow focus frame stays sharp.

 **Single autofocus**
The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger.

 **Multi autofocus**
The focus is automatically set on several areas of the image. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger. Continuous autofocus is off.

 **Face detection**
The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a blue frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

 **Touch focus**
Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger.

 **Object tracking**
When you select an object by touching it in the viewfinder, the camera tracks it for you.

! This setting is only available in **Normal** capturing mode.

Exposure value

 Determine the amount of light in the photo you want to take. A higher value indicates an increased amount of light.

! This setting is only available in **Normal** capturing mode.

HDR

Use the HDR (High Dynamic Range) setting to take a photo against strong back light or in conditions where the contrast is sharp. HDR compensates for the loss of detail and produces a picture that is representative of both dark and bright areas.

! This setting is only available in **Normal** capturing mode.

White balance

The white balance setting adjusts the colour balance according to the lighting conditions.

 **Auto**
Adjusts the colour balance automatically to suit the lighting conditions.

 **Incandescent**
Adjusts the colour balance for warm lighting conditions, such as under light bulbs.

 **Fluorescent**
Adjusts the colour balance for fluorescent lighting.

 **Daylight**
Adjusts the colour balance for sunny outdoor conditions.

 **Cloudy**
Adjusts the colour balance for a cloudy sky.

! This setting is only available in **Normal** capturing mode.

ISO

You can reduce image blurring caused by dark conditions or moving subjects by increasing the ISO sensitivity.

 **Auto**
Sets the ISO sensitivity automatically.

 **100**
Sets the ISO sensitivity to 100.

 **200**
Sets the ISO sensitivity to 200.

 **400**
Sets the ISO sensitivity to 400.

 **800**
Sets the ISO sensitivity to 800.

 **1600**
Sets the ISO sensitivity to 1600.

! This setting is only available in **Normal** capturing mode.

Metering

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

 **Center**
Adjusts the exposure to the centre of the image.

 **Average**
Calculates the exposure based on the amount of light striking the whole image.

 **Spot**
Adjusts the exposure in a very small part of the image that you want to capture.

! This setting is only available in **Normal** capturing mode.

Image stabiliser

When taking a photo, it can be difficult to hold the device steady. The stabiliser helps you by compensating for small movements of the hand.

Geotagging

Tag photos with details of where you took them.

 **On**
When geotagging is turned on, the approximate geographical location is added to photos when you take them. To use geotagging, you must enable location features from the **Settings** menu. For geotags to be added to a photo, the location must be determined before you take the photo. Your location is determined when  appears on the camera screen. When your device is searching for your position,  appears.

 **Off**
When geotagging is turned off, you cannot view the location where you took a photo.

Touch capture

Identify a particular focus area by touching the camera screen with your finger. The photo is taken as soon as you release your finger. This setting is only available when focus mode is set to touch focus.

-  On
-  Off

Shutter sound

Choose to turn on or turn off the shutter sound when you record a video.

Data storage

You can choose to save your data either to a removable SD card or to your device's internal storage.

-  **Internal storage**
Photos or videos are saved on the device memory.
-  **SD card**
Photos or videos are saved on the SD card.

Using the video camera

To record a video using the camera key

- 1 Activate the camera.
 - 2 To start recording a video, press the camera key.
 - 3 To stop recording, press the camera key again.
-  Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the screen

- 1 Activate the camera.
 - 2 Point the camera towards the subject.
 - 3 Tap  to start recording.
 - 4 Tap  to stop recording.
-  Shoot your videos in landscape orientation to get the best results.

To play recorded videos

- 1 Activate the camera.
- 2 Tap the thumbnails at the top right of the screen.
- 3 Flick left or right to browse all photo and video files. Videos are identified by .
- 4 Tap  to play a video.
- 5 To stop playing the video, tap  or .

To delete a recorded video

- 1 Browse to the video that you want to delete.
- 2 Tap an empty area of the screen to make  appear.
- 3 Tap .
- 4 Tap **OK** to confirm.

Using video camera settings

To adjust the video camera settings

- 1 Activate the camera.
- 2 Tap one of the settings icons on the screen.
- 3 To display all settings, tap .
- 4 Select the setting that want to adjust, then make your changes.

To customise the video camera settings panel

- 1 When the video camera is open, tap  to display all settings.
 - 2 Touch and hold the setting that you want to move, then drag it to the desired position.
-  If you drag the setting outside of the settings panel, the change is cancelled.

Video camera settings overview

Scenes

The Scenes feature helps you to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible video.

-  **Off**
The Scenes feature is off and you can shoot videos manually.
-  **Soft snap**
Use for shooting videos against soft backgrounds.
-  **Landscape**
Use for videos of landscapes. The camera focuses on distant objects.
-  **Night**
When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good, to improve the video quality.
-  **Beach**
Use in bright environments to avoid overexposed videos.
-  **Snow**
Use in bright environments to avoid overexposed videos.
-  **Sports**
Use for videos of fast-moving objects. Short exposure time minimises motion blurring.
-  **Party**
Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support.

Video resolution

Adjust the video resolution for different formats.

-  **1920×1080(16:9)**
Full HD (Full High Definition) format with 16:9 aspect ratio. 1920×1080 pixels.
-  **1280×720(16:9)**
HD (High Definition) format with 16:9 aspect ratio. 1280×720 pixels.
-  **640×480(4:3)**
VGA format with 4:3 aspect ratio. 640×480 pixels.
-  **176×144(11:9)**
Record videos suitable for sending in multimedia messages. The recording time of this video format is limited to fit in a multimedia message.

Photo light

Use the light to record videos when lighting conditions are poor or when there is a backlight.

 On

 Off

Sometimes the video quality can be better without a light, even if lighting conditions are poor.

Self-timer

With the self-timer you can record a video without holding the device. Use it to record group videos where everyone can be in the video. You can also use the self-timer to avoid shaking the camera when recording videos.

 On (10 sec.)

Set a 10-second delay from when you tap the camera screen until the video begins to record.

 On (2 sec.)

Set a 2-second delay from when you tap the camera screen until the video begins to record.

 Off

The video begins to record as soon as you tap the camera screen.

Quick launch

Use Quick launch settings to launch the camera from the lock screen. If the device is in sleep mode of camera, press the camera key.

Launch and capture

By pressing and holding down the camera key, the first photo is captured immediately after the camera is launched from sleep mode.

Launch only (still camera)

By pressing and holding down the camera key, the still camera is launched from sleep mode.

Launch and record video

By pressing and holding down the camera key, the first video is shot immediately after the camera video camera is launched from sleep mode.

Launch only (video camera)

By pressing and holding down the camera key, the video camera is launched from sleep mode.

Off

Focus mode

The focus setting controls which part of a video should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

Single autofocus

The camera automatically focuses on the selected subject. Continuous autofocus is on.

Face detection

The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a yellow frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

Object tracking

When you select an object by touching it in the viewfinder, the camera tracks it for you.

Exposure value

This setting allows you to determine the amount of light in the image you capture. A higher value indicates an increased amount of light.

White balance

The white balance setting adjusts the colour balance according to the lighting conditions.

-  **Auto**
Adjust the colour balance automatically to the lighting conditions.
-  **Incandescent**
Adjusts the colour balance for warm lighting conditions, such as under light bulbs.
-  **Fluorescent**
Adjust the colour balance for fluorescent lighting.
-  **Daylight**
Adjust the colour balance for sunny outdoor conditions.
-  **Cloudy**
Adjust the colour balance for a cloudy sky.

Metering

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image that you want to capture.

-  **Center**
Adjust the exposure to the centre of the image.
-  **Average**
Calculate the exposure based on the amount of light striking the whole image.
-  **Spot**
Adjust the exposure in a very small part of the image that you want to capture.

Image stabiliser

When recording a video, it can be difficult to hold the device steady. The stabiliser helps you by compensating for small movements of the hand.

Geotagging

Tag photos with details of where you took them.

-  **On**
When geotagging is turned on, the approximate geographical location is added to photos when you take them. To use geotagging, you must enable location features from the **Settings** menu. For geotags to be added to a photo, the location must be determined before you take the photo. Your location is determined when  appears on the camera screen. When your device is searching for your position,  appears.
-  **Off**
When geotagging is turned off, you cannot view the location where you took a photo.

Microphone

Select whether to pick up the surrounding sound when recording videos.

Touch capture

Identify a particular focus area by touching the camera screen with your finger. The photo is taken as soon as you release your finger. This setting is only available when focus mode is set to touch focus.

-  **On**
-  **Off**

Shutter sound

Choose to turn on or turn off the shutter sound when you record a video.

Data storage

You can choose to save your data either to a removable SD card or to your device's internal storage.

Internal storage

Photos or videos are saved on the device memory.

SD card

Photos or videos are saved on the SD card.

Album

About Album

Use Album to view photos and play videos that you've taken with your camera, or to view similar content that you've saved to your device. You can add geotags to your photos and videos, and then view them on a world map. In Album, you can also view photos and videos that you've uploaded to an online service, for example, to a Picasa™ web album or to Facebook™.

From Album, you can share your favourite photos and videos with friends via Bluetooth™ wireless technology, email, messaging and various online services. You can also perform basic editing tasks on photos and set them as wallpaper or contact pictures. For more information, see *Connecting your device to a computer* on page 101.

Album tab overview

The following tabs are available in Album:

- **Pictures** – view all photos and videos saved on your device.
- **My albums** – view your online albums, and your geotagged photos and video clips on a world map .

To open Album

- 1 From your **Home screen**, tap .
- 2 Find and tap **Album**.

-  If the screen orientation does not change automatically when you turn your device sideways, mark the **Auto-rotate screen** checkbox under **Settings > Display**.

Mobile BRAVIA® Engine

Sony's Mobile BRAVIA® Engine technology improves the viewing quality of photos and videos after you take them, giving you clearer, sharper and more natural images. Mobile BRAVIA Engine is turned on by default, but you can turn it off if you want to reduce battery consumption.

To turn on Mobile BRAVIA® Engine

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Display**.
- 3 Mark the **Mobile BRAVIA Engine 2** checkbox if it is not marked.

Viewing photos and videos in the Pictures tab

In the **Pictures** tab in Album, you can view your photos and videos in thumbnails in a grid view.

Overview of Pictures tab

- 1 Grid view of photos and videos.
- 2 View menu options.
- 3 Scroll up or down to view content.
- 4 Tap a photo or video to view it.
- 5 The date and number of items in the group below.

To view photos and videos in grid view

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Album**. All photos and videos are displayed in a chronologically ordered grid. Videos are indicated by .
 - 3 Tap a photo or video to view it.
 - 4 Flick left to view the next photo or video. Flick right to view the previous photo or video.
-  If the screen orientation does not change automatically when you turn your device sideways, mark the **Auto-rotate screen** checkbox under **Settings > Display**.

To change the size of the thumbnails in Album

- When viewing thumbnails of photos and videos in Album, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To work with batches of photos or videos in Album

- 1 When viewing thumbnails of photos and videos in Album, tap , then tap **Select items**.
 - 2 Tap the items you want to work with. Selected items are indicated by a blue frame.
 - 3 Use the tools in the toolbar at the top of the screen to work with your selected items.
-  To activate selection mode, you can also touch and hold an item until its frame turns blue. Then you can tap other items to select them.

Viewing photos and videos in the My albums tab

The following tiles are available in My albums:

- **Camera albums** – view all photos and videos taken with your device's camera.
- **Internal memory** – view all photos and videos saved to your device's internal storage.

- **My SD card** – view all photos and videos saved to a removable memory card in your device.

Overview of My albums tab

- 1 View photos and videos using the PlayMemories online service.
- 2 View photos and videos on Facebook™.
- 3 View photos and videos in Picasa™.
- 4 View your photos on a map.
- 5 View all photos and videos saved to your device's internal storage.
- 6 View all photos and videos saved to the removable memory card.
- 7 View your photos in globe mode.
- 8 View all photos and videos taken with your device's camera.

To view content in list view in the Camera albums tile

- 1 From your **Home screen**, tap .
- 2 Find and tap **Album** > **My albums** > **Camera albums**.
- 3 Tap a folder that you want to open. The folder's content appears in a chronologically ordered grid. Videos are indicated by .
- 4 Tap a photo or video to view it.
- 5 Flick left to view the next photo or video. Flick right to view the previous photo or video.

- 💡 If the screen orientation does not change automatically when you turn your device sideways, mark the **Auto-rotate screen** checkbox under **Settings** > **Display**.

To view content in list view in the Internal memory tile

- 1 From your **Home screen**, tap .
- 2 Find and tap **Album** > **My albums** > **Internal memory**.
- 3 Tap a folder that you want to open. The folder's content appears in a chronologically ordered grid. Videos are indicated by .
- 4 Tap a photo or video to view it.
- 5 Flick left to view the next photo or video. Flick right to view the previous photo or video.

- 💡 If the screen orientation does not change automatically when you turn your device sideways, mark the **Auto-rotate screen** checkbox under **Settings** > **Display**.

To view content in list view in the My SD card tile

- 1 From your Home screen, tap .
 - 2 Find and tap **Album > My albums > My SD card**.
 - 3 Tap a folder that you want to open. The folder's content appears in a chronologically ordered grid. Videos are indicated by .
 - 4 Tap a photo or video to view it.
 - 5 Flick left to view the next photo or video. Flick right to view the previous photo or video.
-  If the screen orientation does not change automatically when you turn your device sideways, mark the **Auto-rotate** screen checkbox under **Settings > Display**.

Working with photos in Album

You can edit photos in Album. For example, you can crop photos, associate them with contacts, or use them as wallpaper.

To zoom a photo

- When you are viewing a photo, double-tap the screen to zoom in. Double-tap again to zoom out.
- When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To watch a slideshow of your photos

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Slideshow** to start playing all the photos in an album.
- 2 Tap a photo to end the slideshow.

To watch a slideshow of your photos with music

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **SensMe™ slideshow**.
 - 2 Select the music and theme that you want to use for the slideshow, then tap . The Album application analyses your photos and uses SensMe™ music data to play a slideshow.
 - 3 To pause playing, tap the screen to display the controls, then tap .
-  For more information about SensMe™, see *Categorising your music using SensMe™ channels* on page 64.

To rotate a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 Select **Rotate left** or **Rotate**. The photo is saved in the new orientation.

To crop a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Edit photo > Crop**.
- 2 To adjust the crop frame, touch and hold the edge of the crop frame. When the squares at the edges disappear, drag inward or outward to resize the frame.
- 3 To resize all sides of the crop frame at the same time, touch and hold one of the four corners to make the squares at the edges disappear, then drag the corner accordingly.
- 4 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
- 5 To save a copy of the photo as you cropped it, tap **Save**. The original uncropped version remains on your device.

To use a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Use as**.
- 2 Select an option from the list that appears.
- 3 Follow the relevant steps to use the photo.

To edit a photo

- When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Edit photo**.

To share a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 In the menu that opens, tap the application that you want to use to share the photo, then follow the steps to send it.

To add a geotag to a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  to open the map screen.
- 2 Find and tap the desired location to put the photo on the map.
- 3 To adjust the location of the photo, tap the location on the map to where you want to move the photo.
- 4 When you are finished, tap **OK** to save the geotag and return to the photo viewer.

- 💡 When a photo is geotagged,  appears along with location information. You can tap this icon to view the photo on a map.

To delete a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 Tap **OK**.

Working with videos in Album

Use Album to watch videos that you've taken with the camera, downloaded, or copied to your device. You can also share your videos with friends, for example, by uploading them to online services.

To play a video

- 1 Open the **Pictures** tab or the **My albums** tab in Album.
- 2 Using grid view or list view, locate the video that you want to open.
- 3 Tap the video to play it.
- 4 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

To pause a video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Tap .

To fast forward and rewind a video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Drag the progress bar marker left to rewind, or right to fast forward.

To adjust the volume of a video

- Press the volume key.

To share a video

- 1 When a video is playing, tap the screen to display the toolbars, then tap  > **Share**.
- 2 In the menu that opens, tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

- ! You might not be able to copy, send or transfer copyright-protected items. Also, some items may not send if the file size is too large.

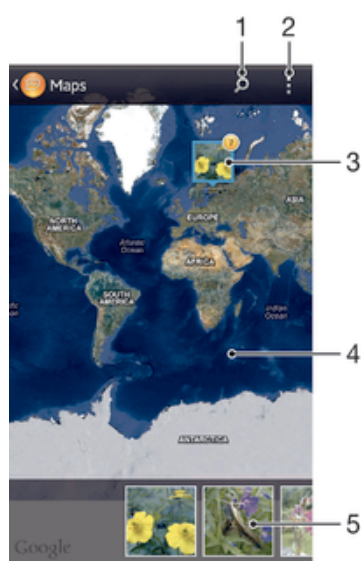

To delete a video

- 1 In Album, find the video you want to delete.
- 2 Touch and hold the video to activate selection mode. The frame of the video thumbnail turns blue when it is selected.
- 3 Tap , then tap **OK**.

Viewing your photos on a map

If you enable location detection when taking photos, you can use the information gathered at a later stage. For example, you can view your photos on a map and show friends and family where you were when you took the photo. Adding location information is also referred to as geotagging. When you enable location detection, you can select to use either GPS satellites or wireless networks, or both, to find your position.

Overview of Maps tile

- 1 Search a location on the map.
- 2 View menu options.
- 3 A group of photos and/or videos geotagged with the same location.
- 4 Double tap to zoom in. Pinch to zoom out. Drag to view different parts of the map.
- 5 Thumbnails of the selected group of photos and/or videos. Tap an item to view it in full screen.

To enable location detection

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Location services**.
- 3 Mark the **GPS satellites** and/or **Google's location service** checkboxes.

To view geotagged photos on a map in Album

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Album > My albums > Maps**.
 - 3 Tap a photo to view it in full screen.
 - 4 If several photos were taken at the same location, only one of them appears on the map. The total number of photos appears in the top right corner, for example, . To view these photos, tap the cover photo and then tap one of the thumbnails at the bottom of the screen.
-  When viewing a geotagged photo in the photo viewer, you can touch the screen to display the toolbars, then tap  to view the photo on the map.

To view geotagged photos on a globe in Album

- 1 From your Home screen, tap .
 - 2 Find and tap Album > My albums > Globe.
 - 3 Tap a photo to view it in full screen.
 - 4 If several photos were taken at the same location, only one of them appears on the map. The total number of photos appears in the top right corner, for example, . To view these photos, tap the cover photo and then tap one of the thumbnails at the bottom of the screen.
-  When viewing a geotagged photo from the camera application, you can touch the screen to display the toolbars, then tap  to view the photo on the map.

To add a geotag when viewing the map in Album

- 1 When viewing the map in Album, tap , then tap **Add geotag**.
- 2 Find and tap the photo to which you want to add the geotag.
- 3 Tap the desired location on the map to set the geotag, then tap **OK**.

To edit the geotag of a photo in Album

- 1 When viewing a photo on the map in Album, touch and hold the photo until its frame turns blue.
 - 2 Drag the photo to the new location.
-  You can also tap the desired location on the map instead of dragging.

To change the map view in Album

- When viewing the map in Album, tap , then select **Classic view**, **Globe view** or **Satellite view**.

Viewing online albums

In Album, view the photos and videos that you and your friends have uploaded to online services, such as Picasa™ and Facebook™. You can view comments from your friends and add your own comments as well.

Overview of online services

- 1 Active online service.
- 2 Name of online album.
- 3 Number of items in the online album.
- 4 Refresh.
- 5 View menu options.

To view photos from online services in Album

- 1 From your **Home screen**, tap .
- 2 Find and tap **Album > My albums**.
- 3 Tap the desired online service.
- 4 Tap **Connect**. All available online albums that you have uploaded to the service are displayed.
- 5 Tap any album to view its content, then tap a photo in the album.
- 6 Flick left to view the next photo or video. Flick right to view the previous photo or video.

To view and add comments to online album content

- 1 When viewing a photo from an online album, tap the screen to display the toolbars, then tap  to view the comments.
- 2 To view more comments, scroll down the screen.
- 3 To add your own comments, enter your comments at the bottom of the screen, then tap **Post**.

To "Like" a photo or video on Facebook™

- While viewing a photo or video from one of your Facebook™ albums, tap the screen to display the toolbars, then tap  to show that you "Like" the item on Facebook™.

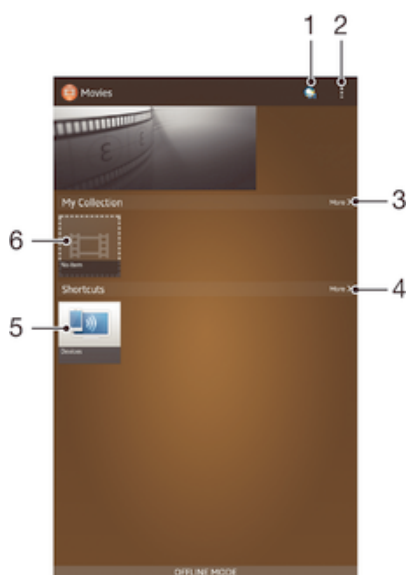

Movies

About Movies

Use the Movies application to play movies and other video content that you've saved on your device. The Movies application also helps you get poster art, plot summaries, genre info and director details for each movie. You can also play your movies on other devices that are connected to the same network.

- ! Videos taken with your device's camera are displayed in the Album application, not in the Movies application.

Overview of Movies

- 1 All video categories available on your device.
- 2 Browse all movies.
- 3 Browse content on other connected DLNA Certified™ devices.
- 4 Browse all TV shows.
- 5 Manage video content from Video Unlimited™.
- 6 View menu options.

- ! Video Unlimited™ may not be available in all countries or regions.

Using Movies

To play a video in Movies

- 1 From your **Home screen**, tap , then find and tap **Movies**.
- 2 Select a video category and browse to the video that you want to play.
- 3 Tap the video you want to select, then tap  to play it.
- 4 To display or hide the controls, tap the screen.
- 5 To pause playing, tap .
- 6 To rewind, drag the progress bar marker left. To fast forward, drag the progress bar marker right.

To play a video in full screen

- 1 When a video is playing, tap the screen to display the controls.
 - 2 Tap .
- 💡 To play the video in its original size, tap .

To share a video

- 1 When a video saved under Movies or TV shows is playing, tap , then tap **Share**.
- 2 Tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

To get movie information manually

- 1 Make sure that your device has an active data connection.
 - 2 From your **Home screen**, tap , then find and tap **Movies**.
 - 3 Tap , then make sure that the **Get video details** checkbox is marked.
 - 4 Open the Movies or TV shows tab and browse to the thumbnail of a file that you want to get information about.
 - 5 Touch and hold the thumbnail for the video, then tap **Search for info**.
 - 6 In the search field, enter keywords for the video, then tap the confirm key on the keyboard. All matches are displayed in a list.
 - 7 Select a search result, then tap **Done**. The download of the information begins.
- ! You also get information about newly added videos automatically when the Movies application is opened and the **Get video details** checkbox is marked. Data transmission charges may apply.
- 💡 If the downloaded information is not correct, tap  and search again using different keywords.

To clear information about a video

- 1 From your **Home screen**, tap , then find and tap **Movies**.
- 2 Select a video category and browse to the video that you want to edit.
- 3 Touch and hold the video thumbnail, then tap **Clear info**.

To play a video on an external device

- 1 Make sure the devices that you want to share files with are connected to the same **Wi-Fi®** network as your device.
- 2 From your **Home screen**, tap , then find and tap **Movies >** .
- 3 Tap **Throw**, then select a device from the list.
- 4 Select the video that you want to play.

To change the sound settings while a video is playing

- 1 While a video is playing, tap the screen to display the controls.
- 2 Tap , then tap **Sound settings**.
- 3 Mark the checkboxes for the sound settings that you want to activate.
- 4 When you're finished, tap **OK**.

To delete a video

- 1 From your **Home screen**, tap , then find and tap **Movies**.
- 2 Select a video category and browse to the video that you want to delete.
- 3 Touch and hold the video thumbnail, then tap **Delete** from the list that appears.
- 4 Tap **Delete** again to confirm.

Video Unlimited™

About Video Unlimited™

Use the Video Unlimited™ service to rent and purchase videos that you can view not only on your Android device, but also on a PC, PlayStation® Portable (PSP®) or PlayStation® 3. Select your pick from the latest Hollywood releases, action movies, comedies, classics, and a range of other categories.

- ! Video Unlimited™ might not be available in all countries or regions.

To open Video Unlimited™

- 1 From your **Home screen**, tap .
- 2 Find and tap .

Video Unlimited™ menu overview

| | |
|---|--|
|  | View your account information |
|  | Search for a video |
|  | View the download status for all your items |
|  | View and change settings for your account, purchases, and downloads |
|  | Add the current video to a wish list |
|  | Delete all items in your wish list |
|  | Delete the video you're currently viewing from the wish list |
|  | Share information about the current video via a social network, email, Bluetooth or other method |
|  | View legal information |

- ! The Video Unlimited™ menu is dynamic, which means that all options are not always available. For example, the option to delete all items in your wish list is only available when you are viewing the list.

To open the Video Unlimited™ menu

- Open **Video Unlimited**, then tap .

Creating a Video Unlimited™ account

You need to create a Video Unlimited™ account if you want to buy or rent movies through the Video Unlimited™ service.

Exploring the Video Unlimited™ selection

Browse videos by category, or enter text to search for a particular item. You can also choose to preview videos you're interested in.

Renting or buying a video

When you rent a video, you have a fixed amount of time in which to view it. This time period varies from market to market. You can also choose to download a purchased video to most Sony™ devices that are connected to your Video Unlimited™ account.

Video Unlimited™ notifications overview

When you buy or rent videos, the following notifications may appear:

-  Downloading of video is completed
-  Downloading has failed. You need to check that, for example, your device is connected to a Wi-Fi® network, and that you have enough free space on your internal storage.
-  Downloading of video is ongoing
-  Downloading is paused
-  Confirmation of successful purchase
-  Rental countdown period has started

Watching a video from Video Unlimited™

You can watch your rented or purchased videos on most Sony™ device that are connected to your Video Unlimited™ account.

Video menu overview

When you watch a video from Video Unlimited™, you can open a menu to get the following options:

-  Delete the current video
-  View information about the current video
-  Change the audio language
-  Change the language of subtitles, or remove subtitles

Connectivity

Sharing content with DLNA Certified™ devices

You can view or play media content saved to your device on other devices such as, for example, a TV, or a computer. Such devices must be DLNA Certified™ by the Digital Living Network Alliance and all devices must be connected to the same Wi-Fi® network in order for content to be shared. You can also view or play content from other DLNA Certified™ devices on your device.

After you set up the sharing of content between devices, you can, for example, listen to music files stored on your home computer from your device, or view photos taken with your device's camera on a large-screen TV.

Playing files from DLNA Certified™ devices on your device

When you play files from another DLNA Certified™ device on your device, this other device acts as a server. In other words, it shares content over a network. The server device must have its content sharing function enabled and give access permission to your device. It also must be connected to the same Wi-Fi® network as your device.

To play a shared track on your device

- 1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
- 2 From your **Home screen**, tap , then find and tap **WALKMAN**.
- 3 Tap **My music** to open the music library.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select the track that you want to play. The track starts playing automatically.

To play a shared video on your device

- 1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
- 2 From your **Home screen**, tap , then find and tap **Movies > Devices**.
- 3 Select a device from the list of connected devices.
- 4 Browse the folders of the connected device and select the video that you want to play.

To view a shared photo on your device

- 1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Album > My albums**. All your available online albums and connected devices are displayed.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select a photo to view it.

Preparing to play content from your device on DLNA Certified™ devices

Before you can view or play media files from your device on other DLNA Certified™ devices, you must set up file sharing on your device. The devices that you share content with are called client devices. For example, a TV, computer or tablet can act as client devices. Your device works as a media server when it makes content available to client devices. When you set up file sharing on your device, you must also give access permission to client devices. After you do so, such devices appear as registered devices. Devices that are waiting for access permission are listed as pending devices.

To set up file sharing with other DLNA Certified™ devices

- 1 Connect your device to a **Wi-Fi®** network.
 - 2 From your **Home screen**, tap , then find and tap .
 - 3 Tap **My music** to open the music library.
 - 4 Press , then tap **Media server**.
 - 5 To turn on the **Share content** function, drag the slider.  appears in the status bar. Your device can now work as a media server.
 - 6 Connect your computer or other devices to the same **Wi-Fi®** network as your device.
 - 7 A notification appears in the status bar of your device. Open the notification and set the relevant access permissions for other devices.
- ! The instructions described above may differ depending on the client devices used. Refer to your client device User guide for more information. If the device cannot connect, check that your **Wi-Fi®** network is working.
- 💡 You can also access the **Media server** menu under **Settings > Xperia™ Connectivity > Media server settings**. If you close the **Media server** view, file sharing function stays running in the background.

To stop sharing files with other DLNA Certified™ devices

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap **My music** to open the music library.
- 3 Press , then tap **Media server**.
- 4 Drag the slider to turn off the **Share content** function.

To set access permissions for a pending device

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap **My music** to open the music library.
- 3 Press , then tap **Media server**.
- 4 Select a device from the **Pending devices** list.
- 5 Select an access permission level.

To change the name of a registered device

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap **My music** to open the music library.
- 3 Press , then tap **Media server**.
- 4 Select a device from the **Registered devices** list, then select **Change name**.
- 5 Enter a new name for the device.

To change the access level of a registered device

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap **My music** to open the music library.
- 3 Press , then tap **Media server**.
- 4 Select a device from the **Registered devices** list.
- 5 Tap **Change access level** and select an option.

To get help about sharing content with other DLNA Certified™ devices

- 1 From your **Home screen**, tap , then find and tap .
- 2 Tap **My music** to open the music library.
- 3 Press , then tap **Media server**.
- 4 Tap .

Playing files on a Digital Media Renderer device

Using DLNA™ technology, you can push media content saved on your device to another device connected to the same **Wi-Fi®** network. The other device must be able to function as a Digital Media Renderer (DMR) device, which means that it can

render, or play, content received from your device. A DMR device can be, for example, a TV with DLNA function, or a PC running Windows® 7 or higher.

- ! The settings for enabling the Digital Media Renderer may vary depending on the device used. Refer to the user guide for the respective device for more detailed information.

To view photos or videos from your device on a DMR device

- 1 Make sure that you have correctly set up the DMR device and that it is connected to the same **Wi-Fi®** network as your device.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Album**.
- 4 Browse to and open the file that you want to view.
- 5 Tap the screen to display the toolbars, then tap  and select a DMR device to share your content with. The selected files start playing in chronological order on the device that you select.
- 6 To disconnect from the DMR device, tap  and select your device. The file stops playing on the DMR device but continues playing on your device.

- 💡 You can also share a video from the Movies application on your device by tapping the video and then tapping .

To play a music track from your device on a DMR device

- 1 Make sure that you have correctly set up the DMR device and that it is connected to the same **Wi-Fi®** network as your device.
- 2 From your **Home screen**, tap , then find and tap **WALKMAN**.
- 3 Tap **My music** to open the music library.
- 4 Select a music category and browse to the track that you want to share, then tap the track.
- 5 Tap  and select a DMR device to share your content with. The track plays automatically on the device that you select.
- 6 To disconnect from the DMR device, tap  and select your device. The track stops playing on the DMR device but continues playing on your device.

NFC

Use Near Field Communications (NFC) to share data with other devices, such as a video, photo, web page address, music file or contact. You can also use NFC to scan tags that give you more information about a product or service as well as tags that activate certain functions on your device.

NFC is a wireless technology with a maximum range of one centimetre, so the devices sharing data must be held close to each other. Before you can use NFC, you must first turn on the NFC function, and the screen of your device must be active.

- ! NFC may not be available in all countries and/or regions.

NFC (Near Field Communication) lets you exchange data between your device and other Android NFC supported devices using Android Beam. For example, you can share web addresses, map locations, applications on Google Play™ and contacts to other Android devices. In addition, you can also transfer photos, music tracks and videos to other Sony Xperia™ devices.

Using NFC, you can also scan NFC tags. NFC tags are small programmed information areas that can be embedded on posters, on billboard advertisements or next to products in retail stores. Touching a tag can give you additional information such as maps, web addresses and movie trailers.

NFC is activated by bringing two NFC devices together. The maximum reading distance is about one centimetre, which helps prevent unauthorised communications.

To turn on the NFC function

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > More....**
- 3 Mark the **NFC** checkbox.

NFC detection area

[Missing image]

- ! The location of the NFC detection area is not the same on all devices. When sharing data with another device using NFC, refer to the User guide of the other device for more information.

To share a contact with another device using NFC

- 1 Make sure that both devices have the NFC function turned on, and that both screens are active.
- 2 To view contacts, go to your **Home screen**, tap , then tap .
- 3 Tap the contact that you want to share.
- 4 Hold your device and the receiving device back to back so that the NFC detection areas of each device touch each other. When the devices connect, they vibrate and play a short sound. A thumbnail of the contact appears.
- 5 Tap the thumbnail to start the transfer.
- 6 When the transfer is done, the contact information is displayed on the screen of the receiving device and is also saved on the receiving device.

To share a music file with another device using NFC

- 1 Make sure that both your device and the receiving device have the NFC function turned on, and that both screens are active.
- 2 To open the "WALKMAN™" application, tap , then find and tap .
- 3 Tap the **My music** tab to open the music library.
- 4 Select a music category and browse to the track you want to share.
- 5 Tap the track to play it. You can then tap  to pause the track. The transfer works whether the track is playing or paused.
- 6 Hold your device and the receiving device back to back so that the NFC detection areas of each device touch each other. When the devices connect, they vibrate and play a short sound. A thumbnail of the track appears.
- 7 Tap the thumbnail to start the transfer.
- 8 When the transfer is done, the music file plays immediately on the receiving device. At the same time, the file is saved on the receiving device.

- ! You might not be able to copy, send or transfer copyright-protected items.

To share a photo or video with another device using NFC

- 1 Make sure that both devices have the NFC function turned on, and that both screens are active.
- 2 To view photos and videos in your device, go to your **Home screen**, tap , then find and tap **Album**.
- 3 Tap the photo or video that you want to share.
- 4 Hold your device and the receiving device back to back so that the NFC detection areas touch each other. When the devices connect, they vibrate and play a short sound. A thumbnail of the photo or video appears.
- 5 Tap the thumbnail to start the transfer.
- 6 When the transfer is done, the photo or video is displayed on the screen of the receiving device. At the same time, the item is saved on the receiving device.

- 💡 You can also use NFC to share a video from the Movies application.

To share a web address with another device using NFC

- 1 Make sure that both devices have the NFC function turned on, and that both screens are active.
- 2 From your **Home screen**, tap .
- 3 To open the web browser, find and tap .
- 4 Load the web page that you want to share.
- 5 Hold your device and the receiving device back to back so that the NFC detection areas touch each other. When the devices connect, they vibrate and play a short sound. A thumbnail of the web page appears.
- 6 Tap the thumbnail to start the transfer.
- 7 When the transfer is done, the web page is displayed on the screen of the receiving device.

Scanning NFC tags

Your device can scan various kinds of NFC tags. For example, it can scan embedded tags on a poster, on a billboard advertisement, or beside a product in a retail store. You can receive additional information, such as a web address.

To scan an NFC tag

- 1 Make sure that your device has the NFC function turned on and that the screen is active.
- 2 Place your device over the tag so that the NFC detection area touches it. Your device scans the tag and displays the content collected. Tap the content of the tag to open it.
- 3 To open the tag, tap it.

Paying for items with your device

You can use the Google Wallet™ application or the Operator wallet application on your device to pay for items in stores that support NFC payment methods. Just tap your device on specially enabled electronic payment pads to pay for your purchases. Payments are backed by a credit or debit card, or by prepaid cards or vouchers. Your payment information is stored in the payment application, so you don't need to enter it every time.

- ! Sony does not warrant the effectiveness of payment services. To use Operator wallet, your SIM card must have a secure element embedded. Contact your network operator for more details.

Google Wallet™

Use the Google Wallet™ application to pay for goods at checkouts. If there is a supported NFC terminal at the checkout, you can just tap your device on the terminal to pay. Google Wallet™ stores details of your credit and debit cards as well as details of coupons and other special offers. Most major credit card types are supported. Security features include a PIN, encrypted storage and the ability to remotely disable a lost wallet.

Operator wallet

The Operator wallet application lets you access a variety of services provided by your network operator, such as the option to pay for items in underground trains and stores. Contact your network operator for more information about such services.

To select a wallet for use on your device

- 1 Make sure that the NFC function is on.
- 2 From your **Home screen**, tap .
- 3 Find and tap **Settings > More....**
- 4 Tap **NFC security handler** and select an option.

Connecting to an NFC compatible device

You can connect your device to other NFC compatible devices produced by Sony, such as a speaker or a headphone. When establishing this kind of connection, refer to the User guide of the compatible device for more information.

- ! You may need to have Wi-Fi® or Bluetooth™ activated on both devices for the connection to work.

Bluetooth® wireless technology

Use the Bluetooth® function to send files to other Bluetooth® compatible devices, or to connect to handsfree accessories. Turn on the Bluetooth® function in your device and create wireless connections to other Bluetooth® compatible devices such as computers, handsfree accessories, and phones. Bluetooth® connections work better within 10 metres (33 feet), with no solid objects in between. In some cases you have to manually pair your device with other Bluetooth® devices.

- ! Interoperability and compatibility among Bluetooth® devices can vary.

To turn on the Bluetooth® function and make your device visible

- 1 Drag the status bar downwards, then tap ✕.
- 2 Tap the on-off switch beside **Bluetooth** to turn on the Bluetooth® function.
- 3 Tap **Bluetooth**. Your device and a list of available Bluetooth® devices appear.
- 4 Tap your device name to make your device visible to other Bluetooth® devices.

To adjust your device's visibility time to other Bluetooth® devices

- 1 Drag the status bar downwards, then tap ✕.
- 2 Find and tap **Bluetooth**.
- 3 Press **⋮** and select **Visibility timeout**.
- 4 Select an option.

Naming your device

You can give your device a name. This name is shown to other devices after you have turned on the Bluetooth® function and your device is set to visible.

To give your device a name

- 1 Make sure that the Bluetooth® function is turned on.
- 2 Drag the status bar downwards, then tap ✕.
- 3 Find and tap **Bluetooth**.
- 4 Tap **⋮** and select **Rename phone**.
- 5 Enter a name for your device.
- 6 Tap **Rename**.

Pairing with another Bluetooth® device

When you pair your device with another device, you can, for example, connect your device to a Bluetooth® headset or a Bluetooth® car kit and use these other devices to share music.

Once you pair your device with another Bluetooth® device, your device remembers this pairing. When pairing your device with a Bluetooth® device, you may need to enter a passcode. Your device will automatically try the generic passcode 0000. If this does not work, refer to the user guide for your Bluetooth® device to get the

device passcode. You do not need to re-enter the passcode the next time you connect to a previously paired Bluetooth® device.

- ! Some Bluetooth® devices, for example, most Bluetooth® headsets, require you to both pair and connect with the other device.
- ! You can pair your device with several Bluetooth® devices, but you can only connect to one Bluetooth® profile at the same time.

To pair your device with another Bluetooth® device

- 1 Make sure that the device you want to pair your device with has the Bluetooth® function activated and is visible to other Bluetooth® devices.
- 2 Drag the status bar downwards, then tap ✕.
- 3 Find and tap **Bluetooth**. All available Bluetooth® devices appear in a list.
- 4 Tap the Bluetooth® device that you want to pair with your device.
- 5 Enter a passcode, if required, or confirm the same passcode on both devices. Your device and the Bluetooth® device are now paired.

To connect your device to another Bluetooth® device

- 1 If you are connecting to a Bluetooth® device that requires you to first pair your device before connecting, follow the relevant steps to pair your device with that device.
- 2 Drag the status bar downwards, then tap ✕.
- 3 Find and tap **Bluetooth**.
- 4 Tap the Bluetooth® device to which you want to connect your device.

To unpair a Bluetooth® device

- 1 Drag the status bar downwards, then tap ✕.
- 2 Find and tap **Bluetooth**.
- 3 Under **Paired devices**, tap ✕ beside the name of the device that you want to unpair.
- 4 Tap **Unpair**.

Sending and receiving items using Bluetooth® technology

Share items with other Bluetooth® compatible devices such as phones or computers. You can send and receive several kinds of items using the Bluetooth® function, such as:

- Photos and videos
- Music and other audio files
- Contacts
- Web pages

To send items using Bluetooth®

- 1 **Receiving device:** Make sure the Bluetooth® function is turned on and that the device is visible to other Bluetooth® devices.
- 2 **Sending device:** Open the application which contains the item that you want to send, and scroll to the item.
- 3 Depending on the application and the item you want to send, you may need to, for example, touch and hold the item, open the item or press the Menu key. Other ways to send an item may exist.
- 4 Select **Share** or **Send**.
- 5 Select **Bluetooth**.
- 6 Turn on Bluetooth®, if you are asked to do so.
- 7 Tap the name of the receiving device.
- 8 **Receiving device:** If asked, accept the connection.
- 9 **Sending device:** If asked, confirm the transfer to the receiving device.
- 10 **Receiving device:** Accept the incoming item.

To receive items using Bluetooth®

- 1 Make sure that the Bluetooth® function is on and is visible to other Bluetooth® devices.
- 2 The sending device now starts sending data to your device.
- 3 If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
- 4 When you are notified of an incoming file to your device, drag the status bar downwards and tap the notification to accept the file transfer.
- 5 Tap **Accept** to start the file transfer.
- 6 To view the progress of the transfer, drag the status bar downwards.
- 7 To open a received item, drag the status bar downwards and tap the relevant notification.

To view files you have received using Bluetooth®

- 1 Drag the status bar downwards, then tap ✕.
- 2 Find and tap **Bluetooth**.
- 3 Press the Menu key and select **Show received files**.

Connecting your device to a computer

Connect your device to a computer and start transferring pictures, music and other types of files. The easiest ways to connect are using a USB cable or Bluetooth® wireless technology.

When you connect your device to the computer using a USB cable, you are prompted to install software on the computer, for example, the PC Companion application on a PC or the Sony™ Bridge for Mac application on an Apple® Mac® computer. PC Companion and Sony™ Bridge for Mac help you access additional computer applications to transfer and organise media files, update your device, synchronise device content, and more.

- ! You might not be able to transfer some copyright-protected material between your device and a computer.

Transferring and handling content using a USB cable

Use a USB cable connection between a computer and your device for easy transfer and management of your files. Once the two devices are connected, you can drag and drop content between your device and the computer, or between your device's internal storage and SD card, using the computer's file explorer.

If you're transferring music, video, pictures or other media files to your device, it's best to use the Media Go™ application on your computer. Media Go™ converts media files so that you can use them on your device.

To transfer content between your device and computer using a USB cable

- 1 Using a USB cable, connect your device to a computer. **Internal storage & SD card connected** appears in the status bar on the screen of your device.
- 2 **Computer:** Open Microsoft® Windows® Explorer from the desktop and wait until your device's internal storage and your SD card appear as external disks in Microsoft® Windows® Explorer.
- 3 **Computer:** Drag and drop the desired files between your device and the computer.

To transfer content between internal storage and an SD card via USB

- 1 Using a USB cable, connect your device to a computer. **Internal storage & SD card connected** appears in the status bar on the screen of your device.
- 2 **Computer:** Open Microsoft® Windows® Explorer from the desktop and wait until your device's internal storage and your SD card appear as external disks in Microsoft® Windows® Explorer.
- 3 **Computer:** Drag and drop the desired files between the device's internal storage and the SD card.

To transfer files directly from internal storage to an SD card in the device

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings > Storage > Transfer data to SD card**.
- 3 Mark the file types you want to transfer to the SD card.
- 4 Tap **Transfer**.

- 💡 The direct transfer method means that a USB cable connection to a computer is not necessary.

Transferring files using Media transfer mode via Wi-Fi®

You can transfer files between your device and other MTP compatible devices, such as a computer, using a Wi-Fi® connection. Before connecting, you first need to pair the two devices. If you're transferring music, video, pictures or other media files between your device and a computer, it's best to use the Media Go™ application on the computer. Media Go™ converts media files so that you can use them on your device.

- 💡 In order to use this feature, you need a Wi-Fi® enabled device that supports Media transfer, for example, a computer running Microsoft® Windows Vista® or Windows® 7.

To pair your device wirelessly with a computer using Media transfer mode

- 1 Make sure Media transfer mode is enabled on your device. It is normally enabled by default.
- 2 Connect your device to the computer using a USB cable.
- 3 **Computer:** Once the name of your device appears on the screen, click *Network configuration* and follow the instructions to pair the computer.
- 4 When you are finished pairing, disconnect the USB cable from both devices.

- ! The above instructions only work if Windows® 7 is installed on your computer and the computer is connected to a Wi-Fi® Access Point via a network cable.

To connect paired devices wirelessly in Media transfer mode

- 1 Make sure Media transfer mode is enabled on your device. It is normally enabled by default.
- 2 Drag the status bar downwards, then tap .
- 3 Tap **Xperia™ Connectivity > USB Connectivity**.
- 4 Tap the paired device that you want to connect to under **Trusted devices**.
- 5 Tap **Connect**.

- ! Make sure the Wi-Fi® function is turned on.

To disconnect a wirelessly paired device in Media transfer mode

- 1 Drag the status bar downwards, then tap ✕.
- 2 Tap **Settings > Xperia™ Connectivity > USB Connectivity**.
- 3 Tap the paired device that you want to disconnect from under **Trusted devices**.
- 4 Tap **Disconnect**.

To remove a pairing with another device

- 1 Drag the status bar downwards, then tap ✕.
- 2 Tap **Settings > Xperia™ Connectivity > USB Connectivity**.
- 3 Tap the paired device that you want to remove.
- 4 Tap **Forget**.

PC Companion

PC Companion is a computer application that gives you access to additional features and services which help you transfer music, video and pictures to and from your device. You can also use PC Companion to update your device and get the latest software version available. The installation files for PC Companion are saved on your device and the installation is launched from the device when you connect it to a computer via USB cable.

You need an internet connected computer running one of the following operating systems to use the PC Companion application:

- Microsoft® Windows® 7
- Microsoft® Windows® 8
- Microsoft® Windows Vista®
- Microsoft® Windows® XP (Service Pack 3 or higher)

To install PC Companion on a PC

- 1 Make sure the **Install software** checkbox under **Settings > Xperia™ Connectivity > USB Connectivity** is marked.
- 2 Connect your device to a PC using a USB cable.
- 3 **Device:** Tap **Install**.
- 4 **Computer:** The PC Companion installer starts automatically after a few seconds. Follow the on-screen instructions to install PC Companion.

To start PC Companion

- 1 Make sure that PC Companion is installed on your PC.
- 2 Open the PC Companion application on the PC, then click **Start** to open one of the features that you want to use.

Sony™ Bridge for Mac

The Sony™ Bridge for Mac application helps you transfer music, video, picture or other kinds of media files between your device and an Apple® Mac® computer. You can also use the Sony™ Bridge for Mac application to manage files through a file browser, update your device software, and back up and restore content on your device.

To use the Sony™ Bridge for Mac application, you must have an Internet-connected Apple® Mac® computer that runs MacOS version 10.6 or later.

To install Sony™ Bridge for Mac on an Apple® Mac® computer

- 1 Make sure the **Install software** checkbox under **Settings > Xperia™ Connectivity > USB Connectivity** is marked.
- 2 Connect your device to an Apple® Mac® computer using a USB cable.
- 3 **Device:** Tap **Install**.
- 4 **Computer:** The Sony™ Bridge for Mac installer starts automatically after a few seconds. Follow the on-screen instructions to complete the installation.

To open the Sony™ Bridge for Mac application

- 1 Make sure that the Sony™ Bridge for Mac application is installed on the Apple® Mac® computer.
- 2 **Computer:** Double-click the Sony™ Bridge for Mac application icon in the Applications folder.

To transfer content using Sony™ Bridge for Mac

- 1 Using a USB cable, connect your device to an Apple® Mac® computer.
- 2 **Computer:** Open the Sony™ Bridge for Mac application. After a few moments, The Sony™ Bridge for Mac application detects your device.
- 3 **Computer:** Drag and drop the desired files between your device and the Apple® Mac® computer.

Connecting your device to a TV set

Connect your device to a TV set and start viewing content saved in your device on a larger screen. When you connect your device to the TV set, the TV launcher application opens. This application helps you to play media files from your device on TVs and other devices.

- 💡 You may have to purchase an MHL cable separately.

To view content from your device on a TV which supports MHL input

- 1 Connect your device to the TV using an MHL cable.  appears in your device's status bar after a connection is established.
- 2 The **TV launcher** application starts automatically. Follow the instructions to view your media files on the TV.

To view content from your device on a TV which supports HDMI™ input

- 1 Connect your device to an MHL adaptor, and connect the adaptor to a USB power supply.
- 2 Connect the adaptor to a TV using a HDMI™ cable.  appears in your device's status bar after a connection is established.
- 3 The **TV launcher** application starts automatically. Follow the instructions to view your media files on the TV.

To view help about using the TV remote control

- 1 While your device is connected to the TV set, drag the status bar downwards to open the Notification panel.
- 2 Tap **MHL connected**.

- 💡 You can also press the yellow button on the TV remote control to open the Notification panel.

To disconnect your device from the TV set

- Disconnect the MHL™ cable or the MHL adaptor from your device.

Screen mirroring

Use Screen mirroring to show the screen of your device on a TV or other large display without using a cable connection. Wi-Fi Direct™ technology creates a wireless connection between the two devices, so you can sit back and enjoy your favourite photos from the comfort of your couch. You can also use this feature to listen to music from your device via the TV's speakers.

- ! Your TV must support screen mirroring based on Wi-Fi CERTIFIED Miracast™ for the functionality described above to work. If your TV does not support screen mirroring, you need to purchase a wireless display adapter separately.
- ! When using screen mirroring, the image quality may sometimes be negatively impacted if there is interference from other Wi-Fi® networks.

To mirror the screen of your device on a TV screen

- 1 Follow the instructions in the User guide for your TV to turn on the screen mirroring function.
 - 2 Drag the status bar downwards, then tap .
 - 3 Find and tap **Display > Screen mirroring**.
 - 4 Tap **Turn on Screen mirroring** and select a device.
- ! When using screen mirroring, do not cover the Wi-Fi antenna area of your device.

Scanning barcodes with the NeoReader™ application

About scanning with the NeoReader™ application

Use your device as a barcode scanner to find out more about items you scan. For example, you see a coat in a magazine ad and want to find the nearest retail outlet to buy it. If the ad contains a readable barcode, the NeoReader™ application uses this code to access mobile web content, such as a web page with more product information or a map of nearby outlets. NeoReader™ supports most standard barcode types.

To start the NeoReader™ application

- 1 From the **Home screen**, tap .
- 2 Find and tap  **NeoReader™**.

To scan a barcode

- 1 When the NeoReader™ application is open, hold your device over the barcode until the complete barcode is visible in the viewfinder.
 - 2 Your device automatically scans the barcode, and vibrates when the barcode is recognised.
- ! Some bar codes might be too small to scan.

To enter a barcode manually

- 1 When the NeoReader™ application is open, tap .
- 2 Enter the numbers of the barcode in the text field, then tap **GO!**.

NeoReader™ application menu overview

The following menu options are available in the NeoReader™ application:

| | |
|---|--|
|  | Tap to open more options |
|  | Enter the barcode numbers manually. This option can be used if your camera has difficulty reading the barcode |
|  | View a list of previously scanned barcodes |
|  | View information about the NeoReader™ application. Read more about different barcode types, and about how to use NeoReader™ |
|  | Select your personal settings, such as language or country. This information is used to personalise barcode content. Also, you can select preferences for how you use the NeoReader™ application |
|  | Send a text message to invite a friend to download the NeoReader™ application |

Using a headset

[Missing image]

- ! Use the accessories provided with your device, or other compatible accessories, for optimal performance.

To use a headset

- 1 Connect the headset to your device.
- 2 To answer a call, press the call handling key.
- 3 To end the call, press the call handling key.

- ! If a headset is not included with the device, you may purchase one separately.
- 💡 If you are listening to music, the music stops when you answer a call and resumes after you end the call.

Smart Connect

Use the Smart Connect application to set what happens in your device when you connect or disconnect an accessory. You can also use Smart Connect to set a specific action or a group of actions to launch on your device at certain times of the day.

For example, when you connect your headset, you can create an event so that the following actions are launched on your device:

- Between 7am and 9am, when you commute to work, the "WALKMAN" application starts, and the web browser opens the morning paper. The ring volume is set to vibrate.
- On the way back from work, the FM radio starts, and a notes app opens showing your shopping list.

To start the Smart Connect application

- 1 From your **Home** screen, tap .
- 2 Find and tap **Smart Connect**.

To create a Smart Connect event

- 1 Start the Smart Connection application. If you are opening Smart Connect for the first time, tap **OK** to close the introduction screen.
- 2 Tap **+**.
- 3 Give the event a name, then tap **Create**.
- 4 Under **When**, add either an accessory or a time interval, or both.
- 5 Under **Do this**, add what you want to happen when connecting accessory or at the specified time in your device.
- 6 Under **At the end**, add what you want to happen when you disconnect the accessory or when the time interval comes to an end. If both these conditions are set, the actions start either when you disconnect the accessory, or when the time interval comes to an end.
- 7 To save the event, press .

- 💡 To add a Bluetooth™ accessory, you have to first pair it with your device.

To edit a Smart Connect event

- 1 Start the Smart Connection application.
 - 2 On the **Events** tab, tap an event.
 - 3 If the event is switched off, drag the slider to the right.
 - 4 Adjust the settings as desired.
 - 5 To save the event, tap ↩.
- 💡 To delete an incorrect entry, touch and hold the entry, then tap ☰ > **Delete event** and tap **Delete** to confirm.

Synchronising data on your device

About synchronising data on your device

You can sync contacts, email, calendar events, and other information with your device from multiple email accounts, synchronisation services and other kinds of accounts, depending on the applications installed on your device. Synchronising your device with other information sources is an easy and practical way to stay up to date.

Synchronising with Google™

Synchronise your device with different Google™ services to keep your information up to date, regardless of which device you're using your Google™ account from. For example, you can synchronise your contacts, Gmail™, calendar and web browser data.

To set up a Google™ account for synchronisation

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Add account > Google**.
- 3 Follow the registration wizard to create a Google™ account, or sign in if you already have an account.
- 4 Mark the **Back up & restore** checkbox if you want to back up data to your Google™ account, then tap **Next**.
- 5 Tap your newly created Google™ account, then tap the items you that want to synchronise.

To synchronise manually with your Google™ account

- 1 From the **Home screen** of your phone, tap .
- 2 Tap **Settings > Google**.
- 3 Tap the Google™ account that you want to synchronise.
- 4 Press , then tap **Sync now**.

To synchronise an application with a Google™ account

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Google**.
- 3 Tap the Google™ account that you want to synchronise with. A list appears of applications that can be synchronised with the Google account.
- 4 Tap the application that you want to synchronise with the selected Google account.

To synchronise the web browser data with Google™ Chrome™

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Accounts & sync**.
- 3 Tap the Google™ account that you want to synchronise with, then tap **Sync Browser**.

To remove a Google™ account

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Google**.
- 3 Tap the Google™ account that you want to remove from the accounts list.
- 4 Press , then tap **Remove account**.
- 5 Tap **Remove account** again to confirm.

Synchronising your corporate email, calendar and contacts

Access your corporate email messages, calendar appointments and contacts directly from your device. View and manage them just as easily as you would from a

computer. After setup, you can find your information in the **Email, Calendar and Contacts** applications.

- ! For you to access the functionality described above, your corporate information must be stored on a Microsoft® Exchange server.

To set up corporate email, calendar and contacts

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Add account > Corporate**.
- 3 Enter your corporate email address and password.
- 4 Tap **Next**. Your device begins to retrieve your account information. If a failure occurs, contact your corporate network administrator for more information.
- 5 Tap **OK** to allow your corporate server to control your device.
- 6 Select what data you want to sync with your device, such as contacts and calendar entries.
- 7 If desired, activate the device administrator to allow your corporate server to control certain security features on your device. For example, you can allow your corporate server to set password rules and set storage encryption.
- 8 When the setup is done, enter a name for the corporate account.

To edit the setup of corporate email, calendar and contacts

- 1 From your **Home screen**, tap .
- 2 Tap **Email**, then tap .
- 3 Tap **Settings** and select a corporate account.
- 4 Change the desired settings.

To set a synchronisation interval for a corporate account

- 1 From your **Home screen**, tap .
- 2 Tap **Email**, then tap .
- 3 Tap **Settings** and select a corporate account.
- 4 Tap **Check frequency** and select an interval option.

To remove a corporate account

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Corporate**, then select the corporate account.
- 3 Tap , then tap **Remove account**.
- 4 Tap **Remove account** again to confirm.

Synchronising with Facebook™

There are two ways to use Facebook™ on your device. You can use the standard Facebook application to access your online Facebook account, or you can synchronise your Facebook account with your device and share content between Facebook™ and a range of other applications. For example, you can share music in the "WALKMAN" application on your device via Facebook. To synchronise your device with Facebook, you must first set up an "Xperia™ with Facebook" account.

To set up an "Xperia™ with Facebook" account on your device

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Add account > Xperia™ with Facebook**.
- 3 Follow the on-screen instructions to sign in to your Facebook™ account, or create a new account.

To synchronise manually with a Facebook™ integration account

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Xperia™ with Facebook**.
- 3 Select the account that you want to synchronise.
- 4 Press , then tap **Sync now**.

To remove an "Xperia™ with Facebook" account

! When you remove an "Xperia™ with Facebook" account from your device, the associated online Facebook account is not deleted and you can still access it from a computer.

- 1 From your **Home screen**, tap .
- 2 Tap **Settings > Xperia™ with Facebook**.
- 3 Select the account that you want to remove.
- 4 Press , then tap **Remove account**.
- 5 Tap **Remove account** again to confirm.

Maps and locations

About location services

Use your device to find out where you are. There are two methods: GPS and wireless networks. Enable the wireless networks option if you only need your approximate location, and want it fast. If you want a more exact position, and have a clear view of the sky, enable the GPS option. In situations where the wireless network connection is weak, you should enable both options to ensure that your location is found.

- ! Sony does not warrant the accuracy of any location services including but not limited to navigational services.

Using GPS

Your device has a global positioning system (GPS) receiver that uses satellite signals to calculate your location.

- ! When you use features that require the GPS receiver to find your location, make sure you have a clear view of the sky.

To enable or disable GPS

- 1 From your Home screen, tap .
- 2 Tap **Settings** > **Location services**.
- 3 Mark or unmark the **GPS satellites** checkbox.

Getting the best performance

The first time you use the GPS it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don't cover the GPS antenna (the highlighted area in the image). The GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn't found after a few minutes, move to another location.

[Missing image]

Google Maps™

Track your current location, view real-time traffic situations and receive detailed directions to your destination. Before taking trips, you can download and save maps to your internal storage to avoid high roaming costs.

- ! The Google Maps™ application requires the use of an Internet connection. You may incur data connection charges when you connect to the Internet from your device. Contact your network operator for more information. The Google Maps™ application may not be available in every market, country or region.

To use Google Maps™

- 1 From your Home screen, tap .
- 2 Find and tap **Maps**.

- ! If you want to use Google Maps™, you have to enable one of the location methods available under **Settings** > **Location services**.

To learn more about Google Maps™

- When you use Google Maps™, press , then tap **Help**.

Viewing your friends' locations with Google Latitude™

Join Google Latitude™ to view your friends' locations on maps and share your location and other information with them.

Using Google Maps™ to get directions

Use the Google Maps™ application to get directions when you travel by foot, public transportation, or car. You can add a shortcut to a destination on your Home screen to get quick directions from wherever you are.

When you view a map, you make an Internet connection, and data is transferred to your device. So it's a good idea to download and save maps to your device before you take a trip. This way, you can avoid high roaming costs.

- ! Sony does not warrant the accuracy of any directional services.

Using the Navigation application

Use the Navigation application in your device to get turn-by-turn instructions on how to get places. The directions are both spoken and displayed on the screen.

- ! The Navigation application may not be available in every market.

To start Navigation

- 1 From your Home screen, tap .
- 2 Find and tap **Navigation**.

Calendar and alarm clock

Calendar

About the calendar

Your device has a calendar for managing your time schedule. If you have a Google™ account, you can also synchronise your device calendar with your web calendar. See *Synchronising your corporate email, calendar and contacts* on page 108.

To set the calendar view

- 1 From your **Home screen**, tap , then find and tap **Calendar**.
- 2 Tap **Month**, **Week** or **Day** to select an option.

To view multiple calendars

- 1 From your **Home screen**, tap , then find and tap **Calendar**.
- 2 Press , then tap **My calendars**.
- 3 Select the calendars you want to view.

To create a calendar event

- 1 From your **Home screen**, tap , then tap **Calendar**.
- 2 Tap **+**.
- 3 Enter the name, time, location and description for the event.
- 4 Select a reminder for the event. To add a new reminder for the event, tap **+**.
- 5 If desired, tap **More** and select another option under **Repetition**.
- 6 Tap **Done**.

-  When the appointment time approaches, your device plays a short sound to remind you. Also,  appears in the status bar.

To view a calendar event

- 1 From your **Home screen**, tap , then tap **Calendar**.
- 2 Tap the event you want to view.

To change the calendar settings

- 1 From your **Home screen**, tap , then tap **Calendar**.
- 2 Press , then tap **Settings**.
- 3 Tap the setting you want to change, then edit as desired.

Alarm clock

About the alarm clock

Use your device as an alarm clock and select any sound in your device as your alarm signal. The alarm does not sound if your device is turned off. But it does sound when your device is set to silent mode.

To open the alarm clock

- 1 From your **Home screen**, tap .
- 2 Find and tap **Alarm & clock**.

To set a new alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap **Add alarm**.
- 4 Tap **Time** and adjust the time by scrolling up and down.
- 5 Tap **Done**.
- 6 If desired, edit other alarm settings.
- 7 Tap **Done**.

To edit an existing alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap the alarm you want to edit.
- 4 Tap **Time** and adjust the time by scrolling up and down.
- 5 Tap **Done**.
- 6 If desired, edit other alarm settings.
- 7 Tap **Done**.

- ! The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.

To deactivate an alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap  next to the alarm you want to deactivate.

To activate an existing alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap  next to the alarm you want to activate.

To delete an alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Touch and hold the alarm you want to delete.
- 4 Tap **Delete alarm**, then tap **Yes**.

To set the ringtone for an alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap the alarm you want to edit.
- 4 Tap **Advanced alarm settings** and unmark the **Style settings** checkbox.
- 5 Tap **Alarm sound** and select an option.
- 6 Tap **Done**, then tap **Done**.

To set a recurring alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap the alarm you want to edit.
- 4 Tap **Repeat**.
- 5 Mark the checkboxes for the desired days, then tap **OK**.
- 6 Tap **Done**.

To set the title for an alarm

- 1 From your Home screen, tap .
- 2 Find and tap **Alarm & clock**.
- 3 Tap the alarm you want to edit.
- 4 Tap **Advanced alarm settings**, then tap the **Alarm text** field and enter a name for the alarm.
- 5 Tap **Done**.

To activate the vibrate function for an alarm

- 1 From your Home screen, tap .
- 2 Find and tap Alarm & clock.
- 3 Tap the alarm you want to edit.
- 4 Tap Advanced alarm settings, then mark the Vibrate checkbox.
- 5 Tap Done.

To set alarms to sound when the device is in silent mode

- 1 From your Home screen, tap .
- 2 Find and tap Alarm & clock, then tap to select an alarm.
- 3 Tap Advanced alarm settings, then mark the Alarm in silent mode checkbox.
- 4 Tap Done.

To snooze an alarm when it sounds

- Tap Snooze - %s min.

To turn off an alarm when it sounds

- Slide  to the right.

Locking and protecting your device

IMEI number

Every device has a unique IMEI (International Mobile Equipment Identity) number. You should keep a copy of this number. If your device is stolen, your network provider can use your IMEI number to stop the device from accessing the network in your country.

To view your IMEI number

- Remove the cover to view your IMEI number.
- Open the phone dialer on your device and enter ***#06#**.

To view your IMEI number in the device

- 1 From your **Home** screen, tap **⋮**.
- 2 Find and tap **Settings > About phone > Status**.
- 3 Scroll to **IMEI** to view the IMEI number.

SIM card protection

The SIM card lock only protects your subscription. Your device will still work with a new SIM card. If the SIM card lock is on, you have to enter a PIN (Personal Identity Number). If you enter your PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You need to enter your PUK (Personal Unblocking Key) and then a new PIN. Your PIN, PIN2 and PUK are supplied by your network operator.

To enable the SIM card PIN lock

- 1 From the **Home** screen, tap **⋮**.
- 2 Find and tap **Settings > Security > Set up SIM card lock > Lock SIM card**.
- 3 Enter the SIM card PIN and tap **OK**.

To change the SIM card PIN

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **Security** > **Set up SIM card lock** > **Change SIM PIN**.
- 3 Enter the old SIM card PIN and tap **OK**.
- 4 Enter the new SIM card PIN and tap **OK**.
- 5 Re-type the new SIM card PIN and tap **OK**.

To change the SIM card PIN2

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings** > **Call settings** > **Fixed dialing numbers** > **Change PIN2**.
- 3 Enter the old SIM card PIN2 and tap **OK**.
- 4 Enter the new SIM card PIN2 and tap **OK**.
- 5 Confirm the new PIN2 and tap **OK**.

To unblock a locked SIM card

- 1 When **Enter PUK and new PIN code** appears, enter the PUK code.
 - 2 Enter a new PIN code and tap **OK**.
- ! If you enter an incorrect PUK code too many times, the SIM card becomes blocked. If this happens, contact your service provider to get a new SIM card.

Setting a screen lock

There are several ways to lock the screen on your device. For example, you can use the Face Unlock feature, which uses a picture of your face to unlock the screen. You can also set a screen unlock pattern, a number-based PIN lock, or a text-based password.

It is very important that you remember your screen unlock pattern, PIN or password. If you forget this information, it may not be possible to restore important data such as contacts and messages. Refer to Sony customer support for more information.

To set up the Face Unlock feature

- 1 From your **Home** screen, tap  > **Settings** > **Security** > **Screen lock**.
 - 2 Tap **Face Unlock**, then follow the instructions in your device to capture your face.
 - 3 After your face is successfully captured, tap **Continue**.
 - 4 Select a backup lock method and follow the instructions in the device to complete the setup.
- ! The Face Unlock feature is less secure than a screen lock pattern, PIN, or password. Someone who looks similar to you could unlock your device.
- 💡 For best results, capture your face in an indoor area that is well lit but not too bright, and hold the device at eye level.

To unlock the screen using the Face Unlock feature

- 1 Activate the screen.
 - 2 Look at your device from the same angle you used to capture your Face Unlock photo.
- 💡 If the Face Unlock feature fails to recognise your face, you need to draw the backup pattern or enter the PIN to unlock the screen.

To disable the Face Unlock protection

- 1 From your **Home** screen, tap  > **Settings** > **Security** > **Screen lock**.
- 2 Draw your backup screen unlock pattern or enter your PIN.
- 3 Tap **Swipe**.

To create a screen unlock pattern

- 1 From the **Home** screen, tap .
- 2 Find and tap **Settings > Security > Screen lock > Pattern**.
- 3 Follow the instructions in your device. You are asked to select a security question that will be used to unlock the device if you forget your screen unlock pattern.

To unlock the screen using a screen unlock pattern

- 1 Activate the screen.
 - 2 Draw your screen unlock pattern.
- ! If the unlock pattern you draw on the screen is rejected five times in a row, you can select to either wait 30 seconds and then try again, or to answer the security question you have selected.

To change the screen unlock pattern

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings > Security > Screen lock**.
- 3 Draw your screen unlock pattern.
- 4 Tap **Pattern**.
- 5 Follow the instructions in your device.

To disable the screen unlock pattern

- 1 From your **Home** screen, tap  > **Settings > Security > Screen lock**.
- 2 Draw the screen unlock pattern.
- 3 Tap **Swipe**.

To create a screen unlock PIN

- 1 From your **Home** screen, tap  > **Settings > Security > Screen lock > PIN**.
- 2 Enter a numeric PIN.
- 3 If necessary, tap  to minimise the keyboard.
- 4 Tap **Continue**.
- 5 Re-enter and confirm your PIN.
- 6 If necessary, tap  to minimise the keyboard.
- 7 Tap **OK**.

To disable the screen unlock PIN

- 1 From your **Home** screen, tap  > **Settings > Security > Screen lock**.
- 2 Enter your PIN, then tap **Next**.
- 3 Tap **Swipe**.

To create a screen lock password

- 1 From your **Home** screen, tap  > **Settings > Security > Screen lock > Password**.
- 2 Enter a password.
- 3 If necessary, tap  to minimise the keyboard.
- 4 Tap **Continue**.
- 5 Re-enter and confirm your password.
- 6 If necessary, tap  to minimise the keyboard.
- 7 Tap **OK**.

To disable the screen unlock password

- 1 From your **Home** screen, tap  > **Settings > Security > Screen lock**.
- 2 Enter your password and tap **Continue**.
- 3 Tap **Swipe**.

Support and maintenance

Updating your device

Update your device to the most recent software version to get optimal performance and the latest enhancements. New software releases may not be compatible with all devices.

You can use the Update center application on your device to run a wireless update or you can use the PC Companion application on a computer to run an update using a USB cable connection. If you update wirelessly, then you can use either a mobile network or a Wi-Fi® network connection. Just make sure you back up and save all data stored on your device before you update.

- ! When you run an update using the Update center application, a data connection is established and related charges may be incurred. Also, the availability of updates over a mobile network depends on your operator. Contact your network operator for more information.

Updating your device wirelessly

Use the Update center application to update your device wirelessly. You can download software updates manually, or you can allow Update service to update your device automatically whenever downloads become available. When the automatic update feature is activated, a notification appears in the status bar every time an update becomes available.

To download software updates manually from Update center

- 1 From your Home screen, tap .
- 2 Find and tap **Update Center**.
- 3 Select the desired application or system update and tap , or tap  to download all application updates.

- ! Application updates launch automatically after download. With system updates, install the update manually after download. Your device will then restart automatically after the installation is finished. You may incur data connection charges when downloading updates over mobile networks.

To activate automatic software updates using the Update Center application

- 1 From your Home screen, tap .
- 2 Find and tap **Update Center**.
- 3 Press , then tap **Settings**.
- 4 Mark the **Allow automatic downloads** checkbox, then tap **Agree**. Updates are now downloaded automatically as soon as they become available.

- ! You may incur data connection charges when downloading updates over mobile networks.

To install system updates

- 1 From your Home screen, tap .
- 2 Find and tap **Update Center**.
- 3 Select a system update that you want to install, then tap .

Updating your device using a USB cable connection

Some updates are not available for wireless download. Notifications appear in the status bar to inform you of such updates. To download and run the updates, you need a USB cable and a computer running the PC Companion application. You can install PC Companion on the computer using installation files saved on your device, or you can download the application directly from www.sonymobile.com/support.

To download the PC Companion application from your device

- 1 Connect your device to a computer using a USB cable.
- 2 When prompted, follow the instructions in your device to launch the installation of PC Companion on the computer.

To download software updates using a USB cable connection

- 1 Install the PC Companion application on the computer you are using, if it is not already installed.
- 2 Connect your device to the computer using a USB cable.
- 3 **Computer:** Launch the PC Companion application. After a few moments, PC Companion detects your device and searches for new software for it.
- 4 **Device:** When notifications appear in the status bar, follow the on-screen instructions to carry out the relevant software updates.

To update your device using an Apple® Mac® computer

- 1 Install Sony™ Bridge for Mac application on the Apple® Mac® computer you are using, if it is not already installed.
 - 2 Using a USB cable, connect your device to the Apple® Mac® computer.
 - 3 **Computer:** Launch Sony™ Bridge for Mac application. After a few moments, Sony™ Bridge for Mac application detects your device and searches for new software for it.
 - 4 **Computer:** If a new software update is detected, a popup window appears. Follow the on-screen instructions to carry out the relevant software updates.
- ! Sony™ Bridge for Mac application is downloadable from www.sonymobile.com/support.

Memory

You can save content to your device's internal storage and to a memory card.

To view the status of your memory

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Storage** to view the status of your memory.

Clearing the application memory

You may sometimes need to clear the memory for an application. This might happen if, for example, the application memory becomes full, or you want to clear high scores for a game. You might also want to delete incoming email, text and multimedia messages in some applications.

To clear the memory for an application

- 1 From your Home screen, tap .
- 2 Find and tap **Settings**.
- 3 Tap **Apps**.
- 4 Tap the application for which you want to clear the memory.
- 5 Tap **Clear cache**.

- ! It is not possible to clear the memory for some applications.

Backup and restore application

Use the Backup and restore application to make backups of content to the internal storage of your phone or to a USB storage device. Such backups can be used to restore your content and some settings in cases where your data gets lost or deleted.

Types of content you can back up

Use the Backup and restore application to back up the following types of data:

- Bookmarks
- Call log

- Contacts
 - Applications downloaded from Google Play™
 - Multimedia messages
 - System settings (such as alarms, ringer volume, and language settings)
 - Text messages
- ! You do not need to back up music files and photos or videos taken with the camera. They are backed up automatically to the device's internal storage.
- ! You may incur additional data transmission charges when you restore applications from Google Play™.

Preparing to use the Backup and restore application

Before backing up your content, you can select the backup destination and the types of data that you want to back up.

To select the backup destination

- 1 From your **Home screen**, tap .
- 2 Find and tap **Back up & restore**.
- 3 Tap **Back up**.
- 4 Tap the bar under **Where to store data**.
- 5 Select the destination to which you want to back up your content.

To select the data types to back up

- 1 From your **Home screen**, tap .
- 2 Find and tap **Back up & restore**.
- 3 Tap **Back up**.
- 4 Select the data types that you want to back up.

To back up content

- 1 From your **Home screen**, tap .
- 2 Find and tap **Back up & restore**.
- 3 Tap **Back up**, then tap **Back up now**.

Restoring backed up content using the Backup and restore application

When you restore backed up content, you must select a backup record to restore from. If you have backed up content several times, you may have several backup records. After you select a backup record, you can then select which types of data to restore.

To restore content from a backup record

- 1 From your **Home screen**, tap .
 - 2 Find and tap **Back up & restore**.
 - 3 Tap **Restore**.
 - 4 Select the record that you want to restore from, then tap **Restore now**.
- ! Remember that any changes you make to your data and settings after you create a backup will get deleted during a restore procedure.

Managing backup records

You can delete or rename records of the backups that you make using the Backup & restore function.

To rename a backup record

- 1 From your **Home** screen, tap .
- 2 Find and tap **Back up & restore**.
- 3 Press , then tap **Manage backup records**.
- 4 Select the backup record that you want to rename.
- 5 Tap .
- 6 Enter a new name and tap **Rename**.

To delete backup records

- 1 From your **Home** screen, tap .
- 2 Find and tap **Back up & restore**.
- 3 Press , then tap **Manage backup records**.
- 4 Select the backup record that you want to delete, or tap if you want to delete all records.
- 5 Tap  > **Delete**.

Resetting your device

You can reset your device to its original settings, with or without deleting all of your personal data. Before you perform a reset, make sure to back up any important data saved on your device.

To perform a factory data reset

- ! To avoid permanent damage to your device, do not restart your device while a reset procedure is underway.
- 1 From your **Home** screen, tap .
 - 2 Find and tap **Settings** > **Backup & reset**.
 - 3 Tap **Factory data reset**.
 - 4 If you also want to erase data such as pictures and music, which is saved to your device's internal storage, mark the **Erase internal storage** checkbox.
 - 5 Tap **Reset phone**.
 - 6 To confirm, tap **Erase everything**.

Battery and power management

Your device has an embedded battery. Keep track of your battery consumption and check what applications are using most power from the **Battery usage** menu. There are several ways to improve the battery performance, for example by using **STAMINA mode** or **Low battery mode**.

Find tips to make the battery last longer at www.sonymobile.com/support.

To check the battery level

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings** > **About phone** > **Status** > **Battery level**.

To access the battery usage menu

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings** > **Power management** > **Battery usage**.

Improving battery performance

The following tips can help you improve battery performance:

- Charge your device often. This will not affect the lifetime of the battery.
- Downloading data from the Internet is power consuming. When you're not using the Internet, you can save power by disabling all data connections over mobile networks. This setting does not prevent your device from transmitting data over other wireless networks.

- Turn off Bluetooth™ and Wi-Fi® when you don't need these features. You can turn them on and off more easily by adding the Quick settings widget to your **Home screen**.
- Use the **STAMINA mode** and **Low battery mode** features to reduce battery consumption. You can select the power saving mode that best suits the way you use your device. You can also customise the settings of each power saving mode.
- Set your synchronisation applications (used to synchronise your email, calendar and contacts) to synchronise manually. You can also synchronise automatically, but increase the synchronisation intervals.
- Check the battery usage menu in your device to see which applications use the most power. Your battery consumes more power when you use video and music streaming applications, such as YouTube™. Some applications downloaded from Google Play™ may also consume more power.
- Close and exit applications that you are not using.
- Lower the screen display brightness level.
- Turn off your device or activate the **Airplane mode** setting if you are in an area with no network coverage. Otherwise, your device repeatedly scans for available networks, and this consumes power.
- Use a Sony original handsfree device to listen to music. Handsfree devices demand less battery power than your device's own loudspeakers.
- Keep your device in standby mode whenever possible. Standby time refers to the time during your device is connected to the network and is not being used.
- Disable any live wallpaper.

To add the Data traffic widget to your Home screen

- 1 Tap and hold an empty area of your **Home screen**.
- 2 Tap **Widgets > Tools**.
- 3 Tap and hold the **Mobile data** widget, then drag it to an empty area of your Home screen.

To add the Quick settings widget to your Home screen

- 1 Tap and hold an empty area of your **Home screen**.
- 2 Tap **Widgets > Tools**.
- 3 Tap and hold the **Quick settings** widget, then drag it to an empty area of your Home screen.

Using STAMINA mode

Activate the **STAMINA mode** feature to pause your **Wi-Fi®** connection, data traffic and several power consuming applications when your screen is inactive. When STAMINA mode is active, you can still receive phone calls, and text and multimedia messages. You can also set up an applications list to allow some applications to keep running when your screen is inactive. Once the screen becomes active again, all paused functions are resumed.

To activate STAMINA mode

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Power management**.
- 3 Tap  next to **STAMINA mode**, then tap **Activate**.

To deactivate STAMINA mode

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Power management**.
- 3 Tap  next to **STAMINA mode**.

To change the settings for STAMINA mode

- 1 From your **Home screen**, tap .
- 2 Find and tap **Settings > Power management**.
- 3 To open the settings menu, tap **STAMINA mode**.
- 4 Add or remove applications, as desired.
- 5 When you're finished, tap **Done**.

Using Low battery mode

You can activate the **Low battery mode** feature when the battery level is low. This feature helps you to adjust the settings for screen brightness, data traffic and the vibrate function so that you can reduce battery consumption.

To activate Low battery mode

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings > Power management**.
- 3 Tap  next to **Low battery mode**, then tap **Activate**.

To deactivate Low battery mode

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings > Power management**.
- 3 Tap  next to **Low battery mode**.

To change the settings for Low battery mode

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings > Power management**.
- 3 To open the settings menu, tap **Low battery mode**.
- 4 Adjust the settings as desired.
- 5 When you're finished, tap .

Support application

To access the support application

- 1 From your **Application** screen, find and tap .
- 2 Find and tap the required support item.

Usage info

For quality purposes, Sony collects anonymous bug reports and statistics regarding your device. None of the information gathered includes personal data.

To allow the sending of usage info

- 1 From your **Home** screen, tap .
- 2 Find and tap **Settings > Xperia™ > Usage info settings**.
- 3 Mark the **Send usage info** checkbox if it is not already marked.
- 4 Tap **Agree** to allow the sending of usage information.

Recycling your device

Got an old device lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you'll protect the environment, too! Find out more about the recycling options in your region at www.sonymobile.com/recycle.

Important information

Important information leaflet

Before you use your device, please read the Important information leaflet provided in the Setup guide in your device or in the box.

To access the setup guide manually

- 1 From the Home screen, tap .
- 2 Tap **Settings** > **Setup guide**.

Limitations to services and features

Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number, 112. Please contact your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply.

Use of certain features and applications described in this guide may require access to the Internet. You may incur data connection charges when you connect to the Internet from your device. Contact your wireless service provider for more information.

Protecting your device from water and dust

To maximise the water resistance of your device, the covers for the micro USB port and the micro SIM and memory card slots must be firmly closed.

Avoid exposing your device to environments with excessive dust or moisture. Normal wear and tear along with damage to your device can reduce its ability to resist dust or moisture. Do not use your device in the following conditions:

Swimming pool

Diving

- ! You should only use the device in water depths of 1.5 metres or less.

Do not use your device in the following conditions:

Sand/mud

Salt water

Other liquid
chemicals

Your device is waterproof and dust resistant in compliance with the Ingress Protection ratings IP5X, IPX5 and IPX8 (see details below). Always firmly attach all covers to ensure the water and dust resistance of the device. If liquid is detected inside the device, for example, underneath one of the covers, your warranty will be void. Never submerge your device in salt water or let the micro USB port, the micro SIM and memory card slots or the headset jack come in contact with salt water. Also, never expose the device to any liquid chemicals, or to moist environments with extreme high or low temperatures. The waterproof ability of the micro USB port, the

micro SIM and memory card slots and the headset jack is not guaranteed in all environments or conditions. After using the device in water, dry off the areas around the micro USB port cover, the cover of the micro SIM and memory card slots and the headset jack.

If the speaker, microphone or headset jack get wet, dry these areas and wait for three hours before using them again. You can, however, use other features in the device that do not utilise the speaker or microphone.

All compatible accessories, including batteries, chargers, handsfree devices and micro USB cables, are not waterproof and dust resistant on their own.

Your warranty does not cover damage or defects caused by abuse or improper use of your device. If you have any further questions about the use of your products, refer to our Customer support service for help.

IP (Ingress Protection) rating

Your device has an IP rating, which means it has undergone certified tests to measure its resistance levels to both dust and water. The first digit in the two-digit IP rating indicates the level of protection against solid objects, including dust. The second digit indicates how resistant the device is to water. The higher the numbers, the higher the respective protection.

Your device is waterproof and dust resistant in compliance with the Ingress Protection ratings IP5X, IPX5 and IPX8 (see details below). These ratings mean that your device is dust resistant and is protected against low pressure water stream as well as against the effects of submersion for 30 minutes in fresh (non-saline) water up to 1.5 metres deep. You can therefore use the device in dusty environments, when your fingers are wet, and in extreme weather conditions, for example, when it's snowing or raining, or when humidity levels are high. See the table below for more details.

| Resistance to solid objects and dust | Resistance to water |
|--|--|
| IP0X. No special protection | IPX0. No special protection |
| IP1X. Protected against solid objects > 50 mm in diameter | IPX1. Protected against dripping water |
| IP2X. Protected against solid objects > 12.5 mm in diameter | IPX2. Protected against dripping water when tilted up to 15 degrees from normal position |
| IP3X. Protected against solid objects > 2.5 mm in diameter | IPX3. Protected against spraying water |
| IP4X. Protected against solid objects > 1 mm in diameter | IPX4. Protected against splashing water |
| IP5X. Protected against dust; limited ingress (no harmful deposit) | IPX5. Protected against water jet spray |
| IP6X. Dust tight | IPX6. Protected against heavy jet spray |
| | IPX7. Protected against the effects of immersion |
| | IPX8. Protected against submersion |

- ! The IPX5 and IPX8 ratings are based on tests lasting 30 minutes in water depths of 1.5 metres. Go to www.sonymobile.com/testresults for more information.
